AUTHOR	Zikopoulos, Marianthi, Ed.
TITLE	Open Doors: 1986/87. Report on International Educational Exchange.
INSTITUTION	Institute of International Education, New York, N.Y.
SPONS AGENCY	United States Information Agency, Washington, D. C.
REPORT NO	ISBN-87206-163-9
PUB DATE	87
NOTE	202p.; Some tables contain small print. Shaded graphs may not reproduce clearly.
AVAILABLE FROM	Institute of International Education, 809 United Nations Plaza, New York, NY 10017 ($29.95).
PUB TYPE	Reports - Research/Technical (143) -- Statistical Data (110)
EDRS PRICE	MF01/PC09 Plus Postage.
DESCRIPTORS	Census Figures; *College Students; English (Second Language); *Enrollment Trends; Females; Foreign Countries; *Foreign Students; Graduate Students; Higher Education; *International Educational Exchange; Majors (Students); Males; National Surveys; Noninstructional Student Costs; Student Characteristics; *Student Exchange Programs; Student Financial Aid; *Study Abroad; Undergraduate Students

ABSTRACT

The annual survey of all regionally accredited U.S. institutions of higher education provides aggregate data on the total number of foreign students in the United States, the number of students from a particular country, the distribution of foreign students among different fields of study, and the geographic distribution of foreign students within the United States. Statistical data are presented in tables in five sections: (1) the annual census of foreign students in the United States (overview, geographic origin, academic characteristics, personal characteristics, distribution by U.S. region and state, distribution in two-year and four-year institutions, distribution in public and private institutions, institutions with the most foreign students, and academic level breakdowns of foreign students); (2) cost-of-living expenditures by foreign students in the United States; (3) intensive English language programs; (4) U.S. study abroad (program types, host regions, countries, and fields of study); and (5) appendices (foreign student enrollment by institution, place of origin, fields of study, place of origin by region and subregion, states within U.S. region, response rate, survey materials, enrollment in intensive English language programs, and study-abroad students by institution). Jerry Wilcox, Cornell University

The Institute of International Education (IIE) was founded in 1919 to promote peace and understanding through cultural and educational exchanges. Over the next 25 years, IIE brought foreign scholars to lecture in U.S. universities, developed exchange programs with Europe and Latin America, and began to publish studies and reports on international educational cooperation. In 1946, it undertook the administration of the Fulbright Program, which has sponsored over 80,000 individuals to date.

At present IIE is the largest and most active not-for-profit organization in the field of international educational exchange. It administers numerous programs on behalf of governments, foundations, corporations, universities, binational centers, and international organizations. Each year it helps 9,000 individuals to participate in these sponsored programs and in IIE's international host activities. IIE reaches an additional 200,000 individuals annually through its educational services, which are made possible through contributions and grants to IIE. These services include free information and counseling, a research and reference library, conferences and seminars, and publications relating to the field of international education.

The following IIE publications focus on foreign study in the United States. They may be purchased from the Communications Division, IIE. An order form is provided at the back of this book for your convenience.

English Language and Orientation Programs in the United States 1988 edition $21.95

Open Doors: Report on International Educational Exchange (Annual), $29.95

Profiles: Detailed Analyses of the Foreign Student Population (Biennial), $29.95

In addition to these publications, the Research Division of IIE can produce tailored reports from two comprehensive data bases for scholars and others interested in international educational exchange. For information and charges regarding these special reports contact the Research Division, IIE, 809 United Nations Plaza, New York, N.Y. 10017, Telephone: (212) 984-5345.

GUIDELINES FOR THE RELEASE OF CENSUS DATA

Reports based on Census data are available to individuals, agencies, or corporations for clearly identified purposes of scholarly research, public information, or recruitment.

Reports will be produced for recruitment purposes only when the employer has indicated that: the openings are for employment in the students' home countries or, in some instances, home regions; students' obligations to the sponsors of their U.S. study and/or to their own governments will be respected; the corporation or agency does not engage in discriminatory practices.

Student names obtained as a byproduct of the Census will not be released in any case without the student's prior consent.

The Institute of International Education reserves the right to request that the proposed use of data be documented and to withhold data when the request is not deemed to be for appropriate scholarly, public information, or recruitment purposes.

DEFINITIONS IN USE THROUGHOUT THIS BOOK

Foreign Student A foreign student is defined as anyone who is enrolled in courses at institutions of higher education in the United States who is not a citizen or an immigrant (permanent resident). Persons with refugee status are included.

F Visa An F visa is a student visa granted to bona fide students who satisfy requirements for pursuing a full program of study at a U.S. academic institution which admits foreign students; who enter the United States for a temporary stay and solely to study; and who have permanent residence in foreign countries that they have no intention of abandoning.

J Visa A J visa is an exchange-visitor visa granted by the United States for a variety of educational purposes, to students, trainees, teachers, professors, research scholars, international visitors, or professional trainees who are sponsored by an agency or organization approved for sponsorship by the Secretary of State for Exchange Visitors.

M Visa An M visa is issued to students enrolling in a vocational training course (other than English language training) in the United States.

Higher Education In respect to the United States, "higher education" is used to describe the group of colleges and universities listed in the HEP 1986 *Higher Education Directory,* Higher Educations Publications, Inc., Washington, DC ISBN 0-914927-04-3.

Fields of Study The fields of study used in this book are those from *A Classification of Instructional Programs,* published by the National Center for Education Statistics (NCES). See *Appendix 3* for the list of fields.

Regions The countries, territories and other places of origin included under each of the major world regions are listed in *Appendix A4.*

ACKNOWLEDGMENTS

To the thousands of men and women of the National Association for Foreign Student Affairs (NAFSA) and the American Association of Collegiate Registrars and Admission Officers (AACRAO), whose cooperation in the collection of these statistics is voluntarily given, whose professionalism and interest is always evident, and whose constructive advice and criticism are greatly appreciated;

to the Bureau of Educational and Cultural Affairs of the United States Information Agency, and in particular Joseph B. Bruns and Adeline C. O'Connell, past and present Chiefs, and Harriet Maguire, Senior Program Officer, Student Support Services, whose support makes possible the collection and analysis of the data;

to John F. Reichard, Executive Vice President of NAFSA, and his Washington staff, for tireless efforts on behalf of the ICDC.

to Peggy Blumenthal for her good humored encouragement and steadying influence;to Elinor Barber for her overall supervision and concern about substantive issues; to Alec Campbell for contributiong to the quality of both data and text; and to Bopha Kchao whose cheerful diligence in preparing and entering data made the finished product a possibility.

to our colleagues at IIE in New York and in the regional offices who assisted both in data collection and in the production of this book;

to Mary Elisabeth Randall and John F. Collins, Jr., past and present presidents of AACRAO; Richard M. Krasno, president of IIE; and Richard D. Downie and Josef Mestenhauser, past and present presidents of NAFSA, for their support and encouragement;

to these and the many other people who assisted in the preparation of this book, we express our gratitude.

Part I: THE ANNUAL CENSUS OF FOREIGN STUDENTS IN THE UNITED STATES

MAJOR TRENDS

Chapter 1: Overview For the first time since 1982/83 the growth rate of the foreign student population in the United States exceeded 1.0%. At 1.7%, the 1986/87 growth rate was triple 1985/86's minimal increase of 0.5% and higher than any year since 1982/83.

Although it is too early to tell if this acceleration signals an end of the 1980's plateau period (a 1.7% increase pales in contrast to the double digit acceleration of the late 1970's), it may represent a potential new trend.

Data on international student flows are drawn from the Unesco Statistical Yearbook 1986 and other sources. A compilation of the most recent data available for each country shows a world-wide total of about 1,047,606 foreign students, 36.9% of whom studied in the U.S. Together, the five leading countries (U.S., France, Germany, U.S.S.R., and the United Kingdom, in descending order) accounted for 70.4% of the world total.

Chapter 2: Geographic Origin Foreign student flows to the United States increased from four regions and decreased from three regions. South and East Asia, which sent the largest number of students in the U.S. (170,700), also showed the largest percentage increase at 8.8%. The European student presence also increased by a substantial 5.3%. Significant percentage decreases occurred in the flows from the Middle East (10.8%), Africa (7.6%), and Latin America (4.4%).

Taiwan remained the leading place of origin; the total number of Taiwanese students in the U.S. reached 25,660. Malaysia stayed in second place with 21,640, despite a drop of 6.0%. The most striking trend is clearly the growth of the student population from China. In 1978/79, China reported a mere 28 students in the U.S.; by 1986/87 there were 20,030. The upper limits of the Chinese student growth are uncertain at present but with an average yearly increase of over 40% since 1980/81, and 43.3% in 1986/87, it would appear that the expansion trend is continuing strongly.

Iran, Nigeria and Venezuela, major sources of U.S. foreign students in the late 1970's, continued their steady decline as sending countries.

Chapter 3: Academic Characteristics The field of study choices of foreign students changed very little between 1985/86 and 1986/87. The numbers of students in engineering have continued to erode slightly, with 21.3% of the total foreign student population, but engineering was still the leading field of study, as it has been since the inception of the census. Three fields of study (engineering, business and management, and math and computer sciences) attracted over half (50.3%) of all foreign students in the U.S. in 1986/87. In 1954/55 these fields accounted for only 32.2%, even though engineering was chosen by 22.3% of the foreign students that year.

While the percentage of graduate students continued its increase (35.8% in 1984/85 to 41.8% in the following year), the proportion of undergraduates at the bachelor's level decreased (46.2% to 40.4% over the same period). Thus, the proportion of foreign students pursuing graduate degrees has risen above those working towards bachelor's degrees for the first time in two decades. The share of students at the associate degree level was unchanged.

Chapter 4: Personal Characteristics Minimal changes occurred in this area. The proportion of female students increased slightly to 31.1% of the total foreign student population, the highest in the history of the census. A larger share of students received their primary support from U.S. colleges and universities than in the past (15.1% in 1986/87 compared to 11.6% in 1984/85), a reflection of the recent trend towards graduate study.

Chapter 5: Distribution by Region and State Regional enrollments changed significantly, as the Northeast became the leading region with 22.8% of all foreign students. The South, which had led for three years in a row, fell to third at 21.9%, and the Midwest came in second with 22.4%.

Chapter 6: Two and four-year Institutions Foreign students attended two and four-year institutions in exactly the same proportions as last year (12.2% and 87.8% respectively). California, with 10,384 two-year students, accounting for 22.4% of all the two-year students.

Chapter 7: Public and Private Institutions. The proportion of foreign students enrolled in public institutions was 65.1%, significantly lower than the total

U.S. higher education population attending such schools (78.2%). This relationship has been essentially stable since 1976/77.

Chapter 8: Institutions With the Most Foreign Students There were 85 institutions with more than 1,000 foreign students, led by Miami-Dade Community College with 5,010. The Massachusetts Institute of Technology had the highest percentage (19.6%) of foreign students in its total enrollment.

Chapter 9: Academic Level Breakdowns The data in this section show wide variations in the graduate/undergraduate profiles of various countries, even countries within the same region. They also show significant variation in field of study choices by graduate and by undergraduate students, with many more graduate students studying social sciences, physical sciences, and humanities, and many more undergraduate students studying business and management .

Chapter 10: Expenditures for Living Costs. The data on student expenditures show that foreign students spending power exceeds two billion dollars.

Chapter 11: Intensive English Language Programs The data show that the number of IELP students increased significantly from 23,956 to 25,044, an increase of 4.5%. Interestingly, the percentage of the total number of IELP students from the top ten sending countries declined slightly, with increases in other sending countries more than compensating for these decreases.

****Chapter 12: Study Abroad** This year IIE instituted a new survey of study abroad by U.S. students. The data show a profile of students leaving the U.S. for overseas studies that is quite different from that of foreign students coming to this country. For instance, two-thirds of U.S. students abroad were women, while women constitute less than one-third of foreign students. Over three-quarters of study abroad students are in Western Europe, while only about a tenth of foreign students come from there. Fewer than 2.0% of U.S. students abroad study engineering; more than 10.0% are in each of the following fields: liberal arts, foreign languages, social sciences, and business.

****New chapter.**

INTRODUCTION

Every year since 1949, the Institute of International Education (IIE) has published an enumeration of the foreign student population in the United States. Originally titled *Education for One World*, it was renamed *Open Doors* in 1955. IIE conducts a survey (the Annual Census of Foreign Students) of all regionally-accredited U.S. institutions of higher education, obtaining from them data on the foreign students they enroll. The 1986/87 edition of *Open Doors* is the result of the most recent survey. IIE's efforts benefit from the advice provided by the Interassociational Committee on Data Collection, (ICDC), which includes representatives of the National Association for Foreign Student Affairs (NAFSA), the American Association of Collegiate Registrars and Admissions Officers (AACRAO), and IIE itself.

Since 1975/76, in response to IIE's redesigned questionnaire, campus officials have provided institutional totals of foreign students in each of the following categories: country of origin, academic characteristics, and personal characteristics. With the aggregate data thus provided, *Open Doors* effectively meets the needs of those who seek information about a single or specific characteristic of the foreign student population, for example:

- the total number of foreign students in the United States
- the number of students from a particular country or region
- the distribution of foreign students among different fields of study
- the geographic distribution of foreign students within the United States
- the number of foreign students at different academic levels.

The excellent response rate to the Open Doors survey (98.4% in 1986/87) means that the survey constitutes a virtual census of the foreign student population, providing an accurate picture of foreign study in this country. For certain purposes, however, aggregate data like those in *Open Doors* are not sufficiently detailed. To provide in-depth information, IIE conducts another, biennial survey, obtaining information about individual foreign students from campus officials. These data, collected in what is known as the Individual Data survey, can be cross-tabulated to yield such information as:

- the proportion of students from a specific country who are undergraduates
- the proportion of male students from a specific country who are studying business and management
- the proportions of foreign engineering students from different world regions
- the proportions of foreign students in different fields of study at different academic levels.

The data collected in the Individual Data Survey are published in *Profiles, Detailed Analyses of the Foreign Student Population.* While the detailed information contained in Profiles has clear advantages for certain kinds of analyses of foreign student flows, *Open Doors* is the best source of information on the broad characteristics of foreign students, since it is based on almost the entire foreign student population.

1. OVERVIEW OF FOREIGN STUDY

This chapter provides an overview of international student exchange, or, to use the term now preferred by some, international student mobility. The first section provides information about the scale and composition of flows of students to the United States, based on data from the Annual Census of Foreign Students in the United States, which has been conducted by IIE for more than three decades, since 1954/55. The second section examines foreign student flows worldwide, based on data collected by Unesco and published in Unesco's *Statistical Yearbook 1986,* or collected directly from individual host countries. These data on worldwide flows provide a context for the presentation of flows to the United States. They permit answers to questions about the extent to which overall worldwide flows remain constant in scale or increase or decrease; about possible changes in shares of the total flows to the major host countries; and about changes in the scale of the flows from different regions or countries.

FLOWS OF FOREIGN STUDENTS TO THE UNITED STATES: THE ANNUAL CENSUS OF FOREIGN STUDENTS IN THE UNITED STATES

Description of the Data The data presented in *Open Doors* for 1986/87 were collected in a survey of 2,896 regionally accredited institutions of higher education in the United Statesin the Fall of 1986 and Spring of 1987.

1974/75	154,600	10,321,500	1.5
1979/80	286,300	11,707,000	2.4
1980/81	311,880	12,087,200	2.6
1981/82	326,300	12,371,700	2.6
1982/83	336,990	12,425,800	2.7
1983/84	338,890	12,393,700	2.7
1984/85	342,110	12,467,700	2.7
1985/86	343,780	12,387,700	2.8
1986/87	349,610	12,410,500	2.8

[1] *Reported total enrollments from 1954/55 to 1982/83 are from the National Center for Education Statistics, Washington, D.C. The reported total enrollment for 1983/84 is from the Annual Survey of Colleges-*Fall Enrollment, *1983, New York: College Board. The total enrollment figure for 1984/85 was based on a reported 1% increase in total undergraduate enrollment and a 2% decrease in graduate total enrollment in the Annual Survey of Colleges-*Fall Enrollment, *1984., New York: College Board. Enrollments since 1985 are from* Fall Enrollment , *New York: College Board.*

Of these institutions, 2,849 or 98.4%, responded; 331 reported enrolling no foreign students. The number of institutions that did report foreign student enrollments, 2,518, was slightly higher than the number of such schools in 1985/86 (**Table 1.1**). A summary of survey response data appears in **Appendix A6**.

Foreign students are widely distributed among U.S. institutions of higher education. **Table 1.1** shows the fluctuations in the number of institutions that reported foreign students over time. The number has grown significantly since the mid-1970s. In 1981/82, a number of unaccredited institutions were eliminated from the survey, resulting in a 10% drop in the total number of institutions in the survey. The number that report foreign students has hovered around 2,500 ever since then.

It should be noted that some variations will appear in foreign student totals in different tables in this publication. Thus, **Table 1.0** lists the total number of foreign students reported as 349,609, the actual number of students, while in **Table 1.2** and in other tables throughout this book, the total has been rounded to 349,610. Inconsistencies are especially noticeable when data from the Annual Census are combined with Unesco data or data obtained from individual host countries. These latter data are the most recently available ones and were not collected uniformly in the same year; as a consequence, totals are not uniform from table to table.

Census Findings ˙ Census data show that although a small increase in foreign student enrollments in the United States did occur in 1986/87, these enrollments

TABLE 1.3 (Unesco)*

Foreign Student Enrollment In Host World Region, 1983[1]

Host Region	Number of Countries	Foreign Students

South and East Asia	13	40,913
U.S.S.R.[2]	1	62,942[2]
TOTAL	115	1,047,606

* *Source: Unesco* Statistical Yearbook 1986 *Table 3.15, "Education at the third level: number of foreign students enrolled", pp.III-418-421.*
[1] *Figures are for 1983 for most of the responding countries.*
[2] *Figure is for 1978.*

are still at a plateau. There were 349,609 foreign students reported in1986/87, only 5,832 or 1.7% more than in 1985/86, and only 2.2% more than in 1984/85 as can be seen in **Table 1.1**.

The levelling-off of foreign student numbers in the 1980s is a significant departure from trends in the 1970s. During the second half of that decade, the annual rate of increase was consistently high, ranging from 16.0% in 1975/76 to 8.5% in 1979/80 and resulting in an overall increase of 58.7% in that four-year period (**Table 1.0** and **Figure 1.A**).

Foreign students constitute a small fraction of all higher education students in the United States. As **Table 1.2** shows, over a period of more than 20 years, from the mid-1950s to the mid-1970s, foreign students accounted, on average, for only 1.5% of all higher education enrollments. Over the next six years, however, their share increased steadily: from 1.8% in 1976/77, it rose to 2.7% in 1982/83, a result of relatively stable U.S. enrollments at a time when foreign student enrollments continued to grow. Since then, the proportion has remained at 2.8%, as foreign student flows levelled off.

STUDENT MOBILITY WORLDWIDE: UNESCO AND OTHER DATA

While the United States is the focus of *Open Doors*, that nation is only one of those that attracts students from the other countries of the world. As will be shown below, the United States is the leading host country in the world at the present time and for many years in the past, but the scale and composition of flows to the United States and changes in the nature of these flows become more meaningful when examined in the context of flows to other countries.

As indicated above, rigorously comparable data on student flows to different countries are not available. The latest data available on worldwide mobility are generally

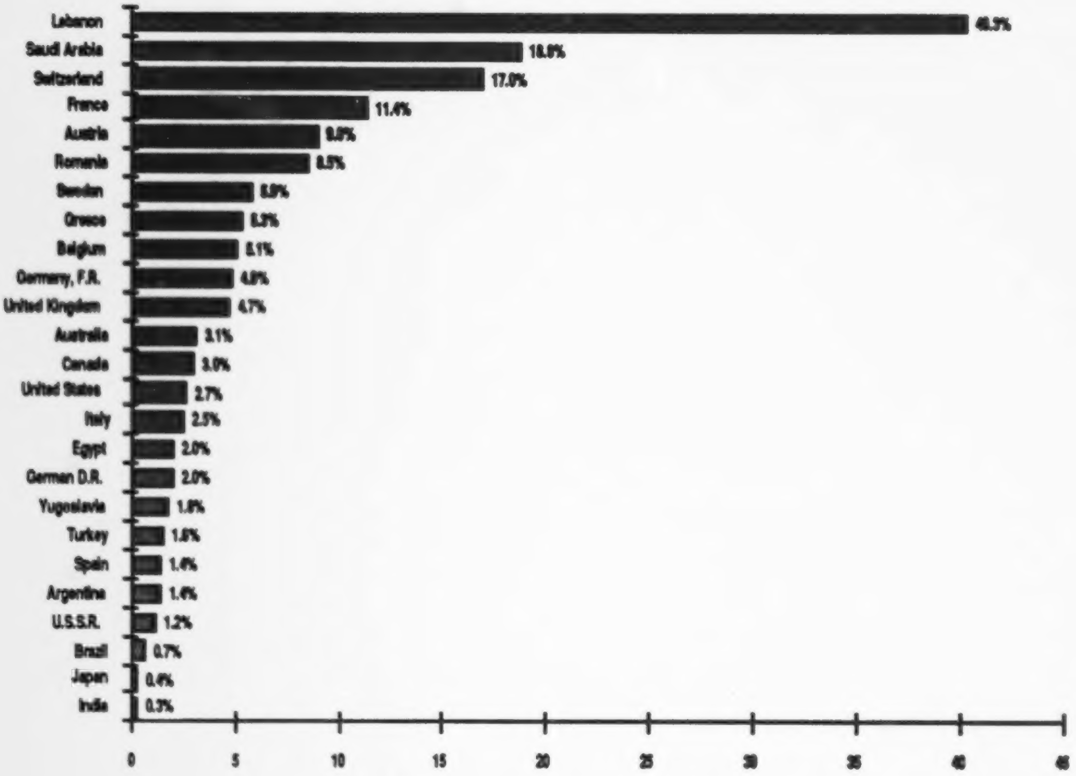
1.B (Unesco)[1]
Foreign Student Proportion of Total Enrollment in Leading Host Countries, 1983[2]



FOREIGN STUDENT PERCENTAGE OF TOTAL ENROLLMENT

1 Source; Unesco Statistical Yearbook1986
2 Vatican City is not included

from 1983, but some data are more recent and others less so. By 1983, 1,041,606 foreign students were reported by 115 responding countries (**Table 1.3**), as recorded in Unesco's *Statistical Yearbook* and other data sources. To complicate matters further, the definition of "foreign student" varies from country to country. Some countries include permanent residents in their reports, while others do not, thereby limiting comparability.

Host Countries with Most Foreign Students Foreign student enrollments have increased dramatically since 1970 in most of the leading host countries (**Table 1.4**). In the United States, the foreign student population in 1983 was almost 250% larger than in 1970. Over the same period, enrollments in France increased by 278%, and in the Federal Republic of Germany by 160%. Similarly, the U.S.S.R. experienced a 125% increase between 1970 and 1978, the last year for which data are available. In the United Kingdom, enrollments rose rapidly in the 1970s, more than doubling from 1970 to 1979. However, the introduction of full-cost tuition in 1979 resulted in a sharp decline in the scale of foreign student numbers, which persisted until 1983. Thus, over the total period from 1970 to 1983 the total increase was a relatively low 72%.

In all host countries, the impact of foreign students on educational institutions is related, at least in part, to the proportion they form of the total higher education student body. The U.S. situation has already been described above in connection with **Table 1.2**. In the other leading host countries (see **Table 1.5** and **Figure 1.B**) these proportions vary considerably, reflecting both the scale of the domestic student population and the scale of the foreign student flow. In five host localities, foreign student enrollments made up more than 10% of total

TABLE 1.5 (Unesco)*

Foreign Student and Total Enrollment in Leading Host Countries, 1983

enrollments in their institutions of higher education: in ascending order, they are France (11.4%), Switzerland (17.0%), Saudi Arabia (18.8%), Lebanon (40.3%), and the Vatican City (100%). In three countries, foreign enrollments accounted for less than one percent: India (.3%), Japan (.4%), and Brazil (.7%). Among European countries, in addition to Switzerland and France, countries with comparatively high ratios are Austria (9.0%) and Romania (8.5%).

In absolute numbers, the United States led in enrollments, reporting two and a half times more foreign students than the second highest host country, France (338,894 compared to 130,224). The Federal Republic of Germany, with 72,267 students, the U.S.S.R., with 62,941, and the United Kingdom, with 42,267 students ranked third, fourth, and fifth respectively. Together these five countries enrolled 70% of the foreign students reported by the 50 countries identified by Unesco as having the largest foreign student populations (**Table 1.6**). It should again be noted that the figure for the U.S.S.R. is from 1978 and that some estimates put the current Soviet total at over 80,000 students. Approximately one third of all foreign students worldwide attended institutions in the remaining 45 leading host countries. According to Unesco, this set of host countries accounts for "approximately 90% of the known total." However, these data may well understate the worldwide flows of students, since some countries, like Brazil and Romania, that have large foreign student populations but do not report country of origin data, were not included.

Distribution by World Region of Origin Preferences for countries of destination vary in different regions of the world, suggesting the importance of such factors as geographic proximity and linguistic compatibility. The resulting distribution of students from the seven world regions and from the U.S.S.R., which is treated in Unesco's statistics as a separate world region, is presented in **Table 1.6** and **Figure 1.C**. Overall, the United States was the destination of 36.9% of all foreign students, followed by France (14.2%), the Federal Republic of Germany (7.8%), the U.S.S.R. (6.9%), and the United Kingdom (4.6%).

Region by region, the result of the choices made, either by individual students or by sponsoring agencies, is as follows:

— Four out of ten African students studied in France (40.5%) and almost two out of ten African students studied in the United States (18.4%).

— Europeans were more evenly distributed among the leading host countries, with 18.7% in the Federal Republic of Germany, 17.7% in the United States, 13.7% in France, and 10.8% in the U.S.S.R.

— Middle Eastern students tended to select the United States (30.9%) and, to a much lesser extent, the Federal Republic of Germany (12.9%).

— Slightly fewer than half of the North Americans (46.3%), consisting mainly of Canadians, studied in the United States.

— Nearly two-thirds of the Latin American students (63.1%) chose the United States.

— Almost six out of ten students from South and East Asia (58.9%) also went to the United States.

— Students from Oceania most often chose to study in the United States (48.4%).

— About one quarter of Soviet students (17.1%) studied in the United States and three quarters enrolled in host countries other than the four with the highest foreign student enrollments, the two largest of which were Hungary (13.2%), and Czechoslovakia (13.0%).

In examining these preferences and the resulting proportions of students who selected one or another host country, it is important to keep in mind that the results in absolute terms are vastly different from the results in percentage terms. Half of all students from Oceania is a relatively small absolute number, while half of all students from South and East Asia is a matter of tens of thousands of students.

Table 1.7 shows the origin of foreign student in various host countries in percentage terms. Thus, in the United States 42.0% of the foreign student population was composed of South and East Asian students, 14.2% of students from the Middle East, and 16.5% of Latin American students; Europeans made up 9.6%, North Americans (4.7%), Oceanians (1.2%), and Soviet students (0.1%). Over half of the foreign students in France (57.5%) came from Africa. In the Federal Republic of Germany, slightly fewer than half of the foreign

students were from Europe (40.3%), about one quarter (27.2%) were from South and East Asia, and little over one eighth (13.7%) were from the Middle East. In the Soviet Union, most foreign students were from South and East Asia (34.4%), Europe (28.4%), Africa (21.7%), and Latin America (15.5%). The largest shares of foreign students in the United Kingdom were held by South and East Asians (37.1%) and Africans (24.0%). Compositions of the foreign student populations in the five leading host countries are illustrated in **Figure 1.D**.

In many of the other leading host countries, the preponderance of foreign students from a single world region was even more pronounced. Thus, European students constituted the majority of foreign students in Switzerland (76.7%), Austria (65.0%), Italy (57.3%), and the Vatican City (54.4%). Similarly, Middle East students predominated in Turkey (85.3%), Greece (82.4%), and Kuwait (56.4%). Over half of the foreign students in Egypt (51.7%) came from Africa, while most foreign students in Austràlia (81.1%) and in Japan (80.1%) came from South and East Asia.

Overall, South and East Asia was the region of origin of 25.9% of all foreign students in the 45 leading host countries, followed by Africa (19.9%), Europe (17.4%), the Middle East (17.0%), Latin America (8.1%), North America (3.5%), Oceania (0.8%), and the Soviet Union (0.1%) (**Table 1.7**).

Distribution by Country of Origin The kind of analysis of host country preferences and their results that has been carried out above on a world region basis can be applied to countries of origin as well. If the flow between two countries is large in absolute terms as well as in in proportional terms, it will, of course, affect the character of the flow from the region where the country is located.

In several countries, over half of students studying abroad chose to come or were sent to the United States (**Table 1.8**). The countries with the largest proportions of their students going to the United States were Canada (86.6%), Japan (78.7%), Nigeria (67.5%), Korea (75.4%), and China* (50.9%). Other strong national preferences are evident: over three-fourths of all Moroc-

can and Algerian students abroad (77.9% and 78.9%, respectively) studied in France, while almost two-thirds (64.6%) of all students from Turkey went to the Federal Republic of Germany.

In some instances, there are clear preferences but lesser concentrations. Many of these patterns suggest the importance of of geographic proximity, cultural affinity, or of linguistic competences. Most foreign students from the United States went to the Federal Republic of Germany (23.1%), Canada (18.4%), and the United Kingdom (16.4%). Nearly half of the students going abroad from the United Kingdom studied in either the United States (33.7%), France (14.9%), or Canada (14.4%). Most West Germans studied in Austria (20.5%), Switzerland (18.3%), the United States (17.7%), or France (16.4%). A large proportion of Greek students were in Italy (38.0%), as well as in the Federal Republic of Germany (21.0%) and France (11.7%). Most Italian students studied in the Vatican City (20.9%), Austria (18.9%), or Belgium (16.8%).

Large proportions of Lebanese students studied in the United States (41.7%) or in France (28.6%). Students from Jordan tended to study in the United States (23.6%) or Lebanon (26.4%). Most Syrian students studied in Lebanon (39.3%) or France (16.5%). Over half (54.4%) of all Egyptian students studied in Lebanon. About half of all Malaysian students abroad were in the United States (43.9%), with almost an equal number from three additional countries: Australia (14.1%) the United Kingdom (12.9%), or Canada (11.7%). And the majority of foreign students from Hong Kong studied either in the United States (36.6%), Canada (35.4%), or the United Kingdom (21.3%).

The largest exodus for study abroad was from five countries: Iran (42,704 students), Malaysia (42,281

students), Greece (32,145 students), Morocco (31,464 students), and Jordan (24,480 students). These large absolute numbers should be kept in mind in assessing the impact of high proportions of students selecting particular host countries. For example, Greek students in Italy or Moroccan students in France certainly are salient components of the foreign student profiles of those countries.

Table 1.9 shows the sources of foreign student flows to five of the leading host countries. These data were collected from various sources within the host countries and are more current than the Unesco data. The data are presented for five of the top six receiving countries in the world; only the U.S.S.R. is not included because data are not available. All of the major sending countries identified through Unesco data appear again as important sources of foreign students; they are here shown to have at least 1,000 students in one or more of the major receiving countries.

These data also show that several countries not identified elsewhere among the top senders have supplied large numbers of students to one or more of the major reeiving nations. Thus, seven countries not among the leading senders account for over 23,000 or 17% of the foreign students in France. The same is true to a lesser degree with regard to flows to Germany and the United Kingdom. These patterns of foreign student flows seem to reflect linguistic, historical, and geographical connections between sender and host. It must also be noted that the figures for U.S. students in these countries are lower than those reported in chapter 12 of this year's *Open Doors*. This is due to the fact that Unesco data include only students engaged in degree work, while chapter 12 describes students who receive academic credit in a U.S. institution for studying abroad, regardless of their enrollment status there.

2. GEOGRAPHIC ORIGIN

WORLD REGION OF ORIGIN AND LEADING PLACES WITHIN WORLD REGION

South and East Asia

Of the 349,610 foreign students reported in 1986/87, the largest group by far (170,700 students) came from countries in South and East Asia, 13,870 more students than in the previous year (Table 2.0 and Figure 2.A). This figure represented an 8.8% increase, five times the rate of increase for all foreign students, which was 1.7% in the last year. South and East Asians accounted for nearly half (48.8%) of the total foreign student population (Table 2.1). About half of these students (53.8% or 91,890 students) were from the subregion of East Asia; approximately one third (29.4% or 50,110 students) were from Southeast Asia; and the remaining 16.8% or 28,700 students were from South and Central Asia (Table 2.2).

2.A
Foreign Students by World Region of Origin, 1954/55-1986/87

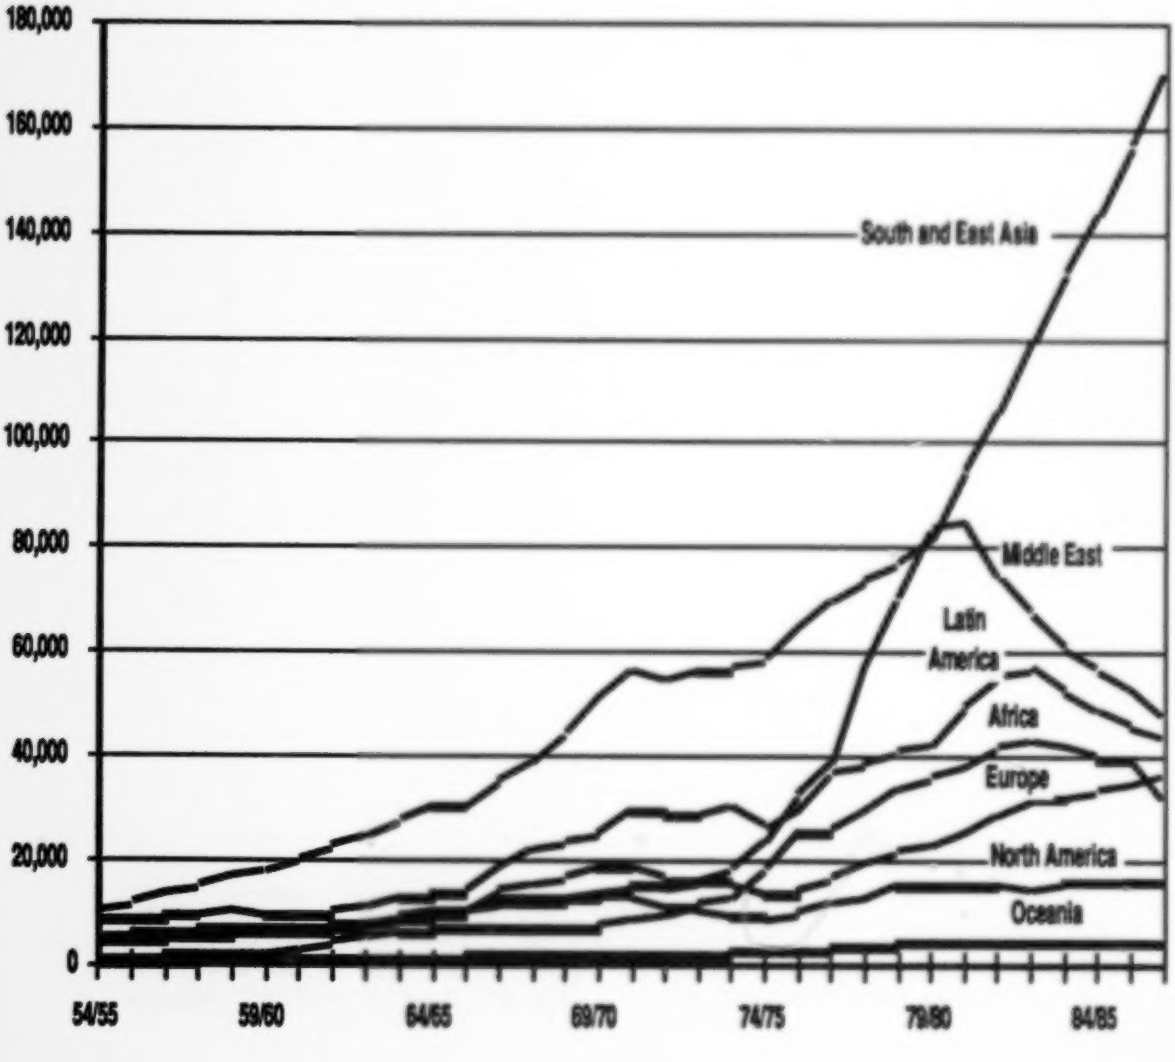

TABLE 2.0

Foreign Students by World Region of Origin and Percentage Change, 1985/86-1986/87

World Region	Foreign Students 1985/86	Foreign Students 1986/87	Foreign Students % Change
Africa	34,190	31,580	-7.6
Europe	34,310	36,140	5.3
Latin America	45,480	43,480	-4.4
Middle East	52,720	47,000	-10.8
North America	16,030	16,300	1.7
Oceania	4,030	4,230	5.0
South and East Asia	15,6830	170,700	8.8
All Foreign Students	343,780[1]	349,610[2]	1.7

[1] Includes 190 students classified as stateless.
[2] Includes180 students classified as stateless.

Since the first Census in 1954-55, students from South and East Asia have constituted the largest subgroup of foreign students, with one exception: in 1979/80, the Middle East led regions of origin (**Figure 2.8**) with 83,700 students, 1,970 more than South and East Asia's 81,730 (**Table 2.1**). The proportion of the foreign student population that South and East Asians make up has become ever greater in the 1980's, rising from 30.4% in 1980/81 to 48.8% in 1986/87.

Leading Places Within South and East Asia. The South and East Asian countries or places that sent the most foreign students in 1986/87 were Taiwan, representing 15.0% of the region's total, followed by Malaysia, with 12.7% of the students, China and the Republic of Korea each with 11.7% of the students, and India with 10.7% of the students. These five places of origin accounted for 61.8% of South and East Asians studying in the United States (**Table 2.3**), and 30.2% of all foreign students.

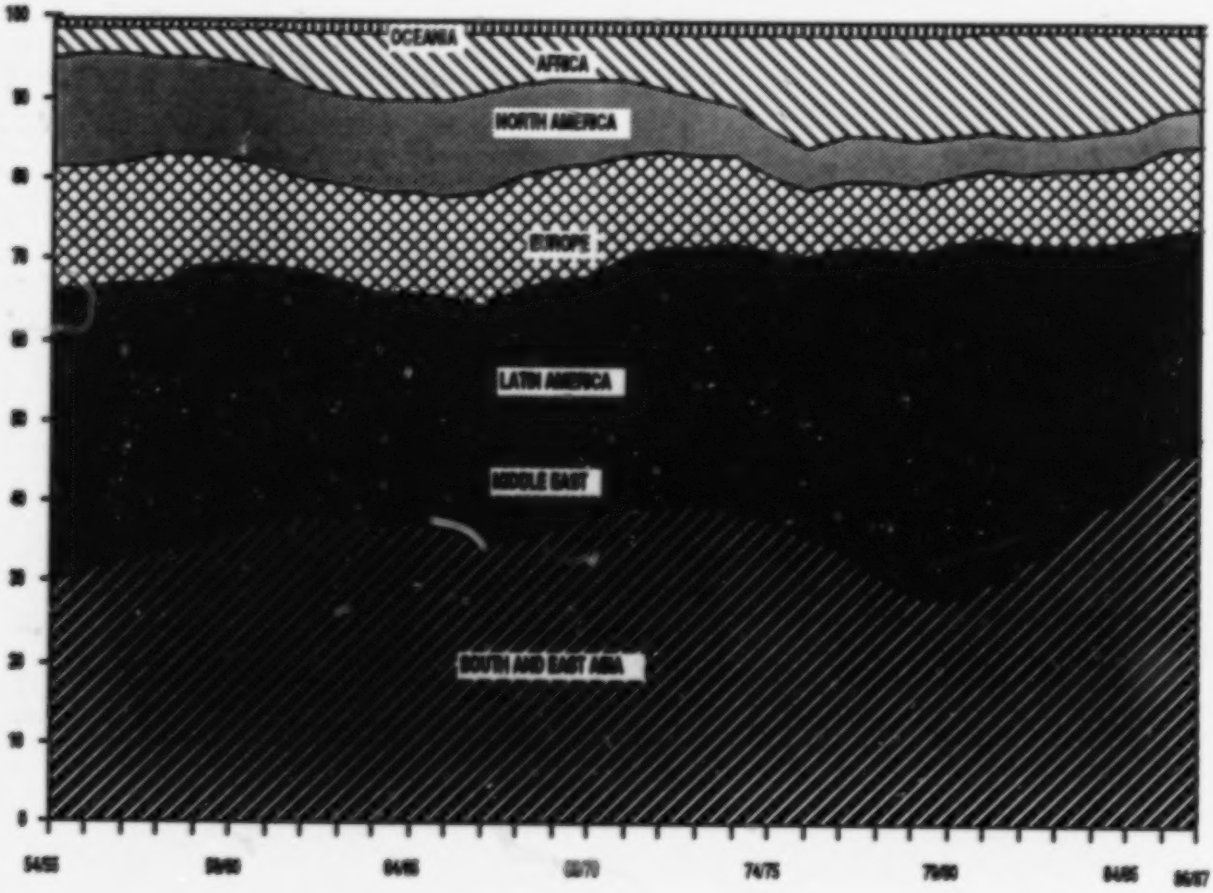
[1] Includes students classified as stateless or of unknown origin.

2.B
Foreign Students by World Region of Origin, 1954/55 - 1986/87



A shift in the pattern of flows from South and East Asia occurred in recent years. Taiwan, traditionally a sender of many foreign students, remained the leading place of origin in 1986/87. However, its share of the regional total steadily dropped as the numbers of students from other countries in the region, especially from China, Malaysia, the Republic of Korea, and India, increased rapidly (**Tables 2.4 and 2.5**).

Middle East

Students from the Middle East made up the second largest subgroup of foreign students (**Table 2.0**). The 47,000 students from this region comprised 13.4% of all foreign students in the United States. Unlike the rising figures for South and East Asians, Middle Eastern enrollment shrank substantially, from the previous year; they dropped by 5,720 students, at a rate of 10.8%.

Student flows from the Middle East in the 1980s differ dramatically from flows in the 1970s. In the early 1970s, the number of Middle Eastern students increased rapidly; from 1974/75 to 1979/80, the share of the foreign student population jumped from 15% to 29% (**Table 2.1**). In 1975/76, Middle Easterners replaced Latin Americans as the second largest regional group of foreign students, and in 1979/80 they became the largest group, surpassing South

and East Asia for that year. However, since 1980/81, student flows from the Middle East decreased rapidly at an average annual rate of 7.4%, resulting in a 1986/87 enrollment figure only 55% that of 1980/81.

Leading Countries in the Middle East. Despite the drastic reduction in their numbers in recent years, the 12,230 Iranians still constituted the largest group of Middle Eastern students, representing 26.0% of the regional total last year (**Table 2.3.** Other countries with relatively high enrollments were Lebanon, with 6,450 students, accounting for 13.7% of Middle Eastern foreign students in 1986/87 and Saudi Arabia with 5,840 students (12.4% of the regional total). Jordan sent 5,650 students (12.0% of the regional total), and Kuwait, sent 3,250 students (6.9% of the regional total). Seven out of ten Middle Eastern students came from these countries.

Iranians have dominated numerically among Middle Eastern students since IIE began collecting data on foreign students in 1954/55. The 1960s and 1970s witnessed dramatic increases in their numbers. While they represented one-fourth (24.4%) of Middle Eastern students in 1954/55, their proportion rose to 38.7% by 1959/60 and jumped to 57.6% by the mid-1970s, reaching 61.3% by 1979/80. However, since 1981/82 their numbers have been decreasing drastically and, by 1986/87, they fell to 26.0% of all Middle Eastern students in the U.S.

Latin America

Numbering 43,480, Latin American students constituted 12.4% of the U.S. foreign student population in 1986/87, the third largest subgroup (**Table 2.1**). Nearly half of them, 19,160 (44.0%), were from countries in South America; 13,070 (30.0%) came from Central American nations; and 11,250 (25.9%) came from the Caribbean subregion. There were 2,000 (4.4%) fewer Latin Americans studying in this country in 1986/87 than in the previous year. This decrease reflects a substantial reduction in the number of students from South America and moderate gains in Central American students (**Table 2.1**).

Table 2.1, which presents the distribution of foreign students by world region of origin from 1954/55 to 1986/87, shows that Latin Americans constituted the second largest group of foreign students until the mid-1970s. In 1975/76, however, they were surpassed by Middle Easterners, and since then have remained in third place, the proportion ranging from 18.4% of the foreign student population in 1976/77 to 12.4% in 1986/87. During the 1980s their numbers,as well as their share dropped. 13,330 fewer Latin Americans studied in the U.S. in 1986/87 than in 1982/83; similarly their share fell by 4.5% during this period.

Leading Countries in Latin America In 1986/87, the leading countries of origin within Latin America were Mexico, with 5,330 students (12.3% of that region's total), followed by Venezuela with 4,870 students (11.2%), Colombia with 3,740 students (8.6%), Brazil with 2,760 students (6.3%) and Jamaica with 2,300 students (5.3%) (**Table 2.3**). These five countries accounted for a little less than half (43.7%) of all Latin American students in the United States.

Over the history of the Census, Venezuela, Mexico, and Colombia have remained leading Latin American countries of origin, although their ranking has fluctuated (**Table 2.3**). In the early 80s Venezuela led, with about one-fifth of all Latin American students, although before 1979/80 its share was only one-tenth. In more recent years, Venezuela's proportion has dropped consistently, reaching 11.2% and second place in 1986/87. Cuba ranked high among leading countries from 1954/55 to 1969/70, leading that region beginning in 1964/65, but disappeared from the ranks of leading countries by 1974/75. In 1986/87, Jamaica replaced Trinidad and Tobago which had moved into fifth place the previous year.

Europe

One out of ten (10.3%) foreign students in the United States in 1986/87 was from Europe. The vast majority of these 36,140 Europeans came from countries in Western Europe, only 1,880 or 5.2% of all European students, coming from Eastern Europe (**Tables 2.0 and 2.2)**

During the 1950s,1960s and early 1970s, Europeans were the third largest group of foreign students, following

South and East Asians and Latin Americans. However, though their actual enrollments increased, their proportion gradually declined during this period. In 1974/75 enrollments began to drop, but increased again in the late 1970s. However, the European share of the foreign student population in the United States stabilized at about 8%, increasing slightly in the last few years to its present 10.3% (**Table 2.1**).

Leading Countries in Europe In 1986/87, the United Kingdom was the European country that sent the largest number of foreign students to the United States, a position it has maintained for two decades. The United Kingdom sent 6,240 students, accounting for 17.3% of all Europeans. It was followed by the Federal Republic of Germany, with 5,090 students (14.1%) of the European total; then Greece, with 4,240 students (11.7%), France with 3,910 students (10.9%), and Spain, with 2,050 students (5.7%). These five countries accounted for six tenths (59.7%) of all European students in the United States (**Table 2.3**).

Four countries—Greece, the Federal Republic of Germany, the United Kingdom, and France—have dominated as Europe's leading senders of foreign students over the 30-year history of the Census, although rankings among them have fluctuated. From 1954/55 to 1959/60, Greece sent the most students, but by 1964/65, the United Kingdom had surpassed it as the leading country of origin, remaining so into the 1980s. In 1986/87 fifth place went to Spain, which replaced Italy (**Table 2.4**).

Africa

There were 31,580 students from Africa studying in the United States in 1986/87, 2,610 (7.6% fewer than in the previous year) (**Table 2.0**). Comprising 9.1% of the foreign student population, they were the fifth largest regional group of foreign students. Approximately one half (15,210 or 48.2%) of the African students came from West Africa; a fifth (6,600 students or 20.9%) came from Eastern Africa; and nearly another fifth (5,470 students or 17.3%) from North Africa (**Table 2.2**).

The representation of Africans among foreign students in the United States has varied considerably in the past three decades, as **Table 2.1** shows. Constituting only 3.6% of foreign students in the United States in 1954/55, the African share grew steadily throughout the early 1960s,

dropped in the late 1960s, then grew again in the 1970s, reaching a plateau of 12.7% of the foreign student population in 1976/77, a level it maintained in the early 1980s. However, since 1981/82, the share of Africans has again been declining, dropping to 9.1% last year.

Leading Countries in Africa More than one third (11,700 or 37.0%) of the African students in 1986/87 came from Nigeria (**Table 2.3**). The numbers of students fromother leading countries in the region were far below that proportion: Egypt with 2,100 students comprised 6.6%, Ethiopia and South Africa with 1,960 students each comprised 6.2%, and Kenya with 1,760 students accounted for 5.6% of all African students. A little more than six out of ten Africans (61.6%) were from these leading countries.

Long-term enrollment trends for the African countries have shown increasingly larger shares of students held by Nigeria until recently, and smaller shares held by Egypt (**Table 2.2**). In 1959/60 Egypt represented 25.0% of all students from Africa and Nigeria, 13.2%. By 1979/80 Nigeria had reached 45.2%, and Egypt had dropped to 4.6% of the region's students. Throughout the early 1980s about half of all African students have been Nigerian, while Egyptian students have comprised slightly over 6%. In the past two years, however, a sharp drop in Nigerian enrollments occurred, bringing the total down by 6,670 and Nigeria's share to 37% from 46.5% in 1984/85.

North America and Oceania

The 16,300 North American foreign students attending U.S. colleges and universities in 1986/87, 15,700 of whom were Canadian, constituted 4.7% of the foreign student population. The 4,230 Oceanians constituted 1.2% (**Table 2.0**).

The number of foreign students from North America has remained fairly constant in recent years, but over the history of the Census, the proportion of North Americans has gradually decreased from 13.8% in 1954/55 to a scant 4.7% in the 1980s. The proportion of Oceanians has remained stable at a small 1.0% to 1.5% since the 1950s. In 1986/87, most Oceanians were from the Trust Territory of the Pacific Islands (1,710 students) and Australia (1,470 students).

LEADING COUNTRIES OR OTHER PLACES OF ORIGIN WORLD-WIDE

The number of students from the 30 countries or places which were the largest senders of foreign students to the United States in 1986/87 are presented in **Table 2.5**, along with 1985/86 figures. The data show that the Taiwanese once again constituted the largest group of foreign students (25,660), 1,890 more than in the previous year. Also, Malaysia maintained second place with 21,640 students, although 1,380 fewer Malaysians studied in the United States in 1986/87 than in the previous year, a decrease of 6.0%. Enrollments from China jumped by 43.3% last year, making that country the third largest sender. With 6,050 more students than in the previous year, China was the country of origin of 20,030 foreign students.

The 30 leading countries or places of origin remained the same from 1985/86 to 1986/87, although rankings changed (**Table 2.5**). Thirteen of the 30 leading senders of foreign students were in South and East Asia; seven were in the Middle East; four were in Latin America; four were in Europe; one was in Africa; and one was in North America. Seven out of the top 10 leading senders in 1986/87 were in South and East Asia. The 15 leading places of origin in 1986/87 represented 58.8% of all foreign students in the United States.

Several noteworthy changes in the student flows from leading places of origin occurred from 1985/86 to 1986/87. China saw its student population grow by 6,050, leaping from seventh to third place. The Taiwanese student population continued to expand, increasing by 1,890 over the previous year. Other expanding populations included India with 2,280 more students, Japan with 1,710 more, and Korea with 1,280 more. The only other country sending an excess of 1,000 students over the previous year was Indonesia with a growth of 1,030.

Large decreases of enrollments from certain areas occurred as well. Venezuela experienced the biggest decline, sending 2,170 fewer students in 1986/87 than in 1985/86. As a result, its ranking changed drastically, from thirteenth to twentieth. The number of students from Nigeria and Iran also diminished significantly, by 2,010 and1,980 respectively. Two other countries lost more than 1,000 students: Malaysia lost 1,380; and Saudi Arabia lost 1,060. As a result of these changes Iran dropped from sixth to eighth, Nigeria from eighth to ninth and Saudi Arabia from fifteenth to sixteenth place.

Table 2.6 ranks the 30 leading places of origin by percentage change from 1985/86 to 1986/87. These 30 localities accounted for a little over three quarters (76.3%) of all foreign students in 1986/87. The largest percentage increase occurred in the flow from China (43.3%), which sent an additional 6,050 students to the United States last year. This rate of increase is more than twice the rate of any other leading sender. The rate of increase from Singapore (15.3%), India (14.2%), and Japan (12.8%) was also high. Largest percentage decreases were experienced by enezuela (30.8%), Vietnam (17.4%), and Saudi Arabia (15.4%).

Table 2.4 provides data on the 15 leading countries or places of origin since 1954/55. Canada, Taiwan, India, Japan, the Republic of Korea, and Iran have been among the leading places of origin since the Census began. In the mid-1950's, Canada sent the greatest number of students, but was replaced as the leading sender by Iran in the mid-1970s. After drastic enrollment reductions, beginning in 1980/81, Iran dropped to second place by 1983/84, replaced by Taiwan. By 1986/87, Iran had descended to eighth place, following Taiwan, Malaysia, China, Korea, India, Canada and Japan.

In 1984/85, there were 64 countries with more than 1,000 students in the United States (**Table 2.7**), representing 92.1% of the foreign student population. These figures have remained stable for the past few years.

3. ACADEMIC CHARACTERISTICS

FIELD OF STUDY

Ever since the Census began, engineering has reigned as the field of study most often chosen by foreign students in the United States. In 1986/87 this field attracted 21.3% of all foreign students (**Figure 3.A**). Business and management, chosen by 18.9% of foreign students in 1986/87, was the second most popular field. Other leading fields of study were mathematics and computer sciences, with 10.1% of foreign students; physical and life sciences, with 7.8%; and social sciences, with 7.3%.

Table 3.0, which compares field-of-study choices of foreign students for the last two years, shows that the fields chosen most frequently in 1986/87 have changed little since the previous year. (Appendix A3 contains a summary of field-of-study categories, as well as the NCES detailed classification of programs). The most notable change was a 10.8% increase in the number of foreign students studying the humanities, representing an absolute increase of 1,290 students. This recent increase was in direct contrast to 1985/86, when enrollments in this field fell by 8.6% over the previous year, and reversed that drop.

Engineering presents an interesting, if not dramatic pattern of change. Although enrollments in this field fell only slightly in the last year (290 fewer students chose this field in 1986/87 than in 1985/86) this decline followed two consecutive drops in the recent past, reducing the share of engineering students from 23.1% in 1983/84 to 21.3% last year. The field of fine and applied arts again lost ground, attracting 580 fewer students than in the previous year, while education gained 450 students for an increase of 3.9%.

Even though short-term changes have been relatively minor, substantial long-term shifts have occurred in the choice of field of study of foreign students (**Table 3.1** and **Figure 3.B**). Business and management and mathematics and computer sciences have steadily increased in attractiveness. While only 8.6% of foreign students studied business and management in the 1950s, as many as 19% did so in the 1980s. Similarly, one-tenth of the students chose mathematics and computer sciences in the 1980s, compared to a mere 1.3% in the mid-1950s. By contrast, the proportions of foreign students in the

humanities, social sciences, physical and life sciences, and health sciences have shrunk considerably since the late 1960s. Engineering, education, fine and applied arts, and agriculture have attracted fairly consistent proportions of foreign students over the 30-year history of the Census.

Enrollment In Two- and Four-Year Institutions by Field of Study As Table 3.2 shows the distribution of foreign students by field of study in two- and four-year institutions and in public and private institutions. In 1986/87, 87.8% of all foreign students reported were enrolled in four-year institutions, but that proportion was much higher in certain fields of study. For example, 98.3% of all foreign students who studied humanities were in four-year institutions, as were 97.0% of the foreign students in the physical and life sciences and in the social sciences, 96.1% of the students in education, and 95.4% of the students in agriculture. In other fields the percentages attending two-year and four-year institutions are close to the national average. For instance,of those who studied health sciences, 12.8% were in two-year colleges, as were 11.7% of those in mathematics and computer sciences, and 12.1% of those in business and management. Disproportionately high proportions of students in Intensive English Language Programs and in the "Other" category, one fourth of each group, were attending two-year institutions.

Enrollment In Public and Private Institutions by Field of Study The proportions of foreign students who attended public and private institutions also differed substantially according to field of study (**Table 3.2**). While 65.1% of all foreign students were enrolled in public institutions in 1986/87, 92.7% of foreign students majoring in agriculture, 73.2% of those majoring in mathematics and computer sciences, 71.9% of those in engineering, 70.8% of those in education and 70.5% of those in physical and life sciences attended public schools. Private institutions, with only 34.9% of the total foreign student body, enrolled over half (52.7%) of all foreign students in the humanities, nearly half (44.1%) of those in fine and applied arts, and 42.0% of those in the social sciences.

Fields of Study within Two- and Four-Year Institutions Since most foreign students in the United States were enrolled in four-year institutions, field-of-study choices of these students were very similar to those of the foreign-student body as a whole. However, choices by students in two-year institutions differed considerably from the overall pattern as **Table 3.3** and **Figure 3.C** show. The relatively few foreign students who go to two-year colleges tend to go there to study business and management, Thus among foreign students in two-year institutions 21.5% chose business and management, compared to 18.6% in four-year schools. In contrast, only 2.0% of students in two-year colleges studied social sciences, compared to 8.0% of students in four-year institutions. Similarly, physical and life sciences attracted 2.2% of foreign students in two-year colleges, compared with 8.5% in four-year schools. The proportions of students in agriculture, engineering, education, fine and applied arts, and humanities were also smaller in two-year than in four-year institutions.

Fields of Study within Public and Private Institutions In **Table 3.4** we present the field-of-study distribution of foreign students in public and private institutions. It reveals that the choices of students in public schools closely reflect those of the foreign student body as a whole, but the distribution in private schools deviates from that pattern. Thus, more than one-fifth of foreign students attending private institutions in 1986/87 (21.8%) studied business and management, compared to 17.5% in public institu-

tions. Private institutions also reported larger percentages of students in the humanities, social sciences, fine and applied arts and Intensive English Language Programs than did public schools. Private institutions enrolled smaller proportions of foreign students in engineering, agriculture, mathematics and computer sciences, physical and life sciences, and education than did public institutions. In summary, the profile of foreign students attending private institutions is somewhat different from that of students in public ones, at least with regard to field of study choices.

TABLE 3.6

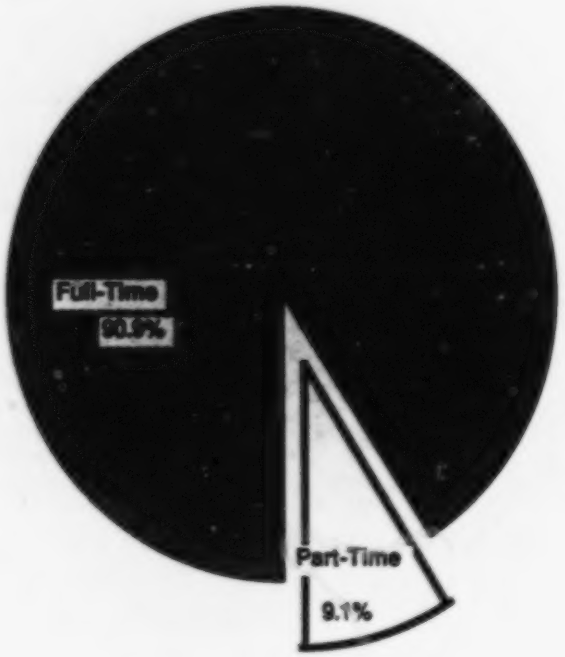
Part-Time	18.3	7.9	9.1	10.3	6.7

ACADEMIC LEVEL

As shown in **Table 3.5** and illustrated in **Figure 3.E**, about half of the foreign students in 1986/87 studied at the undergraduate level. Four out of ten students (40.4% or 141,250 students) were enrolled in bachelor's degree programs, and slightly more than one in ten (11.4% or 39,980 students) enrolled in associate-degree programs. Of the 146,100 students enrolled in graduate programs, representing 41.8% of the foreign student population, somewhat fewer than half (68,230 students, or 19.5% of the total) studied at the master's level, and one third (43,710 students, or 12.5% of the total) studied at the doctoral level. The remaining students were either in non-degree programs or involved in practical training.

The distribution of foreign students within academic

3.D
Foreign Students By Enrollment Status



level for the last three academic years, presented in **Table 3.5**, shows that the number and the share of foreign graduate students rose again, as it did in the previous two years, while the number of students studying at the bachelor's level decreased during the same period. Associate-degree programs, which had experienced a drop in enrollment in 1985/86, reported 4.0% more students in 1986/87, a numerical increase of 1,520 students. Similarly, the number of foreign students in practical training was up by 580, an increase of 14%.

Students at different academic levels attended public and private institutions in different proportions. Virtually all those at the associate level (94.1%) enrolled in public institutions, since most two-year schools are public (**Table 3.6**). Students at the bachelor's level showed the greatest preference for private institutions: nearly four out of ten of them (39.3%) were attending such institutions, compared with one third (33.1%) of the graduate students.

Examination of data from past years (**Table 3.7**) shows that, in the mid-1950

.2%) were undergraduates and about four of ten (38.8%) were graduate students. The proportion of graduate students rose steadily in the 1960's, reaching a high of 48.3% in 1969/70, but declined sharply to 35.3% by 1979/80. Graduate enrollments began to rise again in the 1980s, however, and by 1986/87, 41.8% of all foreign students were studying at the graduate level.

ENROLLMENT STATUS

Nine out of ten (90.9%) foreign students in the United States were enrolled as full-time students last year (**Figure 3.F**). This percentage has remained fairly constant in recent years (**Table 3.8**).

More foreign students were enrolled part-time in two-year (18.3%) than in four-year (7.9%) institutions (**Table 3.9**). Also, a larger proportion of foreign students in public institutions (10.3%) studied part-time than did students in private institutions (6.7%) (**Table 3.9**).

4. PERSONAL CHARACTERISTICS

GENDER

In 1986/87, there were 240,730 male and 108,880 female foreign students in the United States, representing 68.9% and 31.1% of foreign students respectively. These ratios are illustrated in **Figure 4.A.** The proportion of women, as low as 21.7% in 1959/60, increased gradually and reached 30.2% by 1984/85, then fell slightly the following year. Last year it increased again, surpassing all previous levels (**Table 4.0**). The biggest increase in female enrollments occurred in two-year institutions, with women constituting almost 12% more of the two-year student population in 1986/87 than in the previous year. The percentage of women attending public colleges and universities also increased, while slight proportional gains by women took place in four-year institutions (**Table 4.1**).

MARITAL STATUS

Eight out of ten foreign students (79.7%) reported in 1986/87 were single, as shown in **Figure 4.B**. This ratio has remained relatively constant over the past three survey years (**Table 4.2**).

A higher proportion of the foreign students in two-year institutions were single (90.6%) than students attending four-year institutions (78.4%) (**Table 4.3**).

PRIMARY SOURCE OF FUNDS

Once again, approximately two-thirds of the foreign students reported in 1986/87 (64.3%) used personal and family funds as their primary source of income (**Table 4.4** and **Figure 4.C**). An additional 10.0% were primarily supported by their home governments or universities. Financial support from U.S. colleges and universities, including scholarships, grants, and research or teaching assistantships, was the primary source of income for 15.1% of foreign students. These three sources provided major funding for nine out of ten of all foreign students. Other primary sources of funds for foreign students were foreign and U.S. private sponsors (2.9% and 2.7% respectively), the U.S. government (2.5%), and current employment in the United States (1.6%).

Support from Foreign & U.S. Sources Sources of funds originating in the United States and funding from foreign sources, including personal and family funds are presented in **Figure 4.C**. As can be seen, the vast majority

4.A
Foreign Students by Gender, 1954/55-1986/87

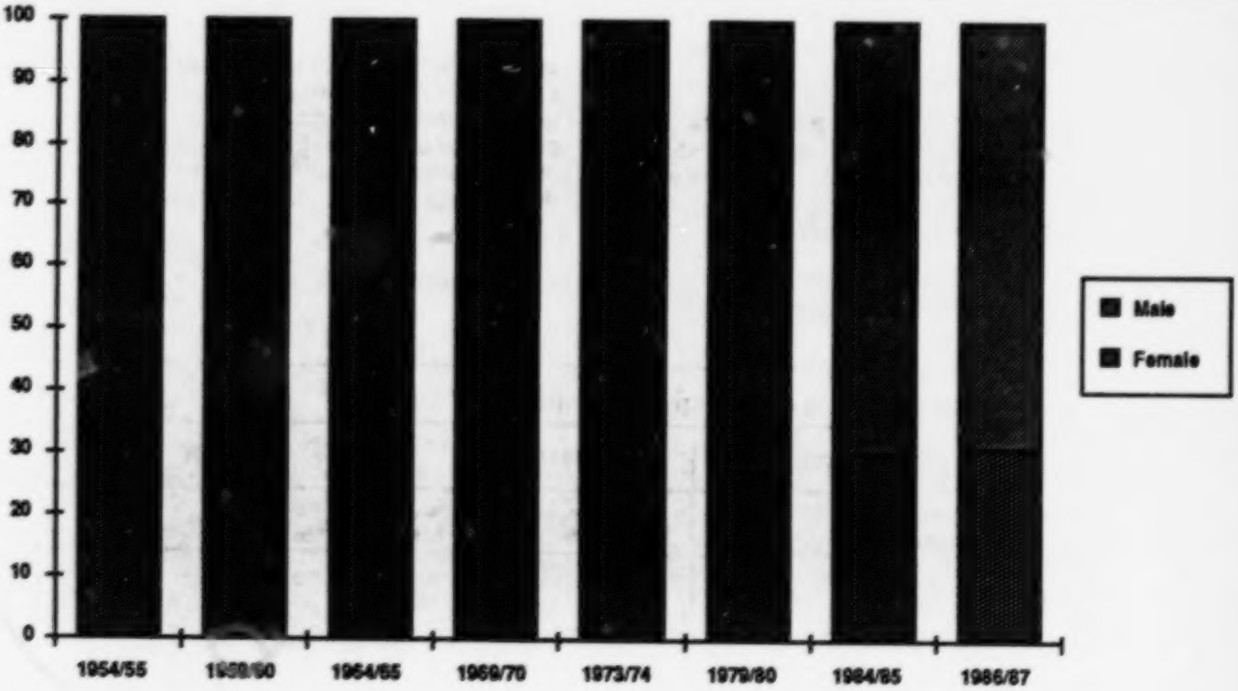


TABLE 4.0

Foreign Students by Gender, Selected Years, 1954/55-1986/87								
Gender	1954/55	1959/60	1964/65	1969/70	1973/74	1979/80	1984/85	1986/87
Male	76.8%	78.3%	78.0%	75.4%	74.7%	72.4%	69.8%	68.9%
Female	23.2	21.7	22.0	24.6	25.3	27.6	30.2	31.1

of foreign students (77.2%) financed their studies primarily with funds originating outside the U.S. Only a relatively small proportion of students (21.9%) received primary support from U.S. sources. This distribution has remained relatively stable in the past three years (**Table 4.4 and Figure 4.D**).

Sources of Support in Two- and Four-Year Institutions The proportion of students whose primary source of income was the institution they attended was much higher in four-year than in two-year institutions. In 1986/87, only 1.1% of foreign students in two-year institutions received their primary funding from their school, while as many as 17.4% of the students in four-year institutions did so (**Table 4.5**). Many more students in two-year institutions, 84.0%, relied on personal and family funds than did their counterparts in four-year institutions (61.1%). The proportion of students receiving their major financial support from the U.S. government was about the same for two- and for four-year institutions (2.8% and 2.4% respectively). By contrast, the proportion of two-year students relying on funding from their home governments or universities (3.7%) was substantially lower than that of four-year students (11.1%).

Sources of Support in Public and Private Institutions As in the past, the primary sources of funding of foreign students in public and in private institutions were dissimilar in 1986/87 but the margins are narrowing (**Table 4.5**). Substantially higher proportions of students attending public schools (66.5%) relied on personal and family resources for major financial support than did students attending private institutions (60.4%). However, a larger percentage of foreign students in private schools (17.6%) obtained support from their U.S. college or university than did students in public institutions (13.8%). And a higher

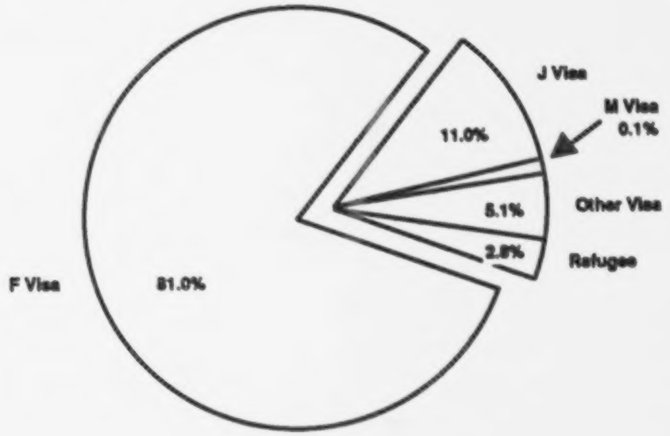
programs. Refugees accounted for 2.8% of foreign students in 1986/87, while only 0.1% held M visas, the visa for students enrolled in vocational training courses. Complete definitions of the F, J, and M visa appear in the front of this book.

A much higher proportion of students in two-year than in four-year institutions were refugees. Among two-year students, the proportion of refugees was 15.8%, much higher than the 1.0% among four-year students (Table 4.7 and Figure 4.F). The opposite is true of students holding J visas who made up 12.1% of the population of four-year students but only 1.7% of the two-year students. The visa status of students in public and private institutions, as shown in Table 4.7, did not differ substantially.

4.C
Foreign Students by Visa Type



5. DISTRIBUTION BY U.S.REGION AND STATE

DISTRIBUTION BY U.S. REGION

The regional distribution of foreign students in the United States, stable since 1983/84, changed in 1986/87. The South, which for the past three years had the most foreign students, experienced a decline in total numbers, while enrollments rose in the Northeast and in the Midwest. The Northeast led last year with reported enrollments of 79,606 students, folowed by the Midwest with 78,288 students,

and the South with 76,582 students. The Pacific region was once again in fourth place with 62,839 students, followed by the Southwest with 39,866 students, the Mountain region with 10,707 students, and the U.S. territories (the "other" category) with 1,721 students (**Table 5.0**). Enrollments in the South and in the Southwest decreased by 1.0% and 4.1% respectively over the previous year. The Northeast and Midwest experienced substantial gains in foreign student enrollments (6.4% and 3.5% respectively); in the Mountain and Pacific regions the gains were more moderate (2.1% and 1.1%). Finally, a large percentage increase in enrollment occurred in Guam, Puerto Rico, and the Virgin Islands (6.3%), an actual increase of only 102 students. (**Appendix A5** lists the states within each U.S. region.)

Foreign students were concentrated in the more populous regions of the United States, with two-thirds of them (67.1%) fairly equally divided among the Northeast, South, and Midwest regions, as seen in **Table 5.1**. Another large group (18.0%) was in the Pacific region. The Southwest enrolled a little over a tenth (11.4%) and the Mountain region 3.0% of all foreign students.

Foreign students have not always been so evenly distributed among U.S. regions. From 1954 to 1969, more than half of them attended institutions in the Northeast and Midwest, with almost one-third studying in the Midwest by the late 1950s (**Table 5.1** and **Figure 5.A**). The regional distribution remained relatively stable until the mid-1970s. Then, in the late 1970s, enrollments and rankings began to fluctuate. The Pacific region, which had ranked third for many years, became the leading region in foreign student enrollment until 1980/81, but dropped to fourth place by 1982/83. Enrollments in the fourth-ranked South increased rapidly, dominating for the first time in 1983/84 and remaining first until this year's fall to third place.

Distribution by World Region of Origin Although foreign students as a whole were evenly spread among the more populous U.S. regions, the distribution of students from different world regions and subregions varied considerably (**Table 5.2**). Students from Latin America and Africa attended Southern institutions in proportions (41.5% and 30.4% respectively) much higher than foreign students overall (21.9%). By contrast, relatively few Latin Americans and Africans chose the Pacific region (8.6% and 8.1% respectively) although that region had 18.0% of all foreign students. Europeans were concentrated in the Northeast; nearly one-third of them (30.8%) chose institutions in this region, although only 22.8% of all foreign students attended schools there.

Middle Eastern and South and East Asian students were distributed among U.S. regions in proportions close to those for all foreign students. Notable exceptions are the underrepresentation of South and East Asians in the South (15.6%, compared to the average 21.9%) and their overrepresentation in the Midwest (26.8%, compared to the average 22.4%). North Americans, primarily Canadians, clustered in the regions close to the border, with 31.1% in the Midwest, 24.6% in the Northeast, and 8.0% (compared to a foreign student average of only 3.0%) in the Mountain region. Students from Oceania also appear to have been influenced by geography, with 38.7% attending schools in the Pacific region.

Leading Countries or Other Places of Origin **Table 5.3** shows the distribution among the U.S. regions of foreign students from each of the 15 countries or other places which sent the most students in 1986/87. Several countries are overrepresented in particular U.S. regions. For instance four out of ten Malaysian students (39.4%) studied in the Midwest in 1986/87, and one-third (34.0%) of Nigerian students attended schools in the South. Three Asian places of origin with large proportions of their students in the Pacific region were Indonesia, with 47.8%; Hong Kong, with 39.2%; and Japan, with 33.2%.

Origin of Foreign Students within U.S. Regions Another way of viewing distributional patterns of foreign students in the United States is to examine the region of origin of foreign students attending institutions in each U.S. region (**Table 5.4**). The foreign student composition in the Northeast was similar to the overall composition of foreign students in the United States last year, except for the overepresentation of Europeans. In the South, students from South and East Asia (36.0%) and Latin America (24.4%) comprised the majority of foreign students, while over half of all foreign students in the Midwest (55.4%) and

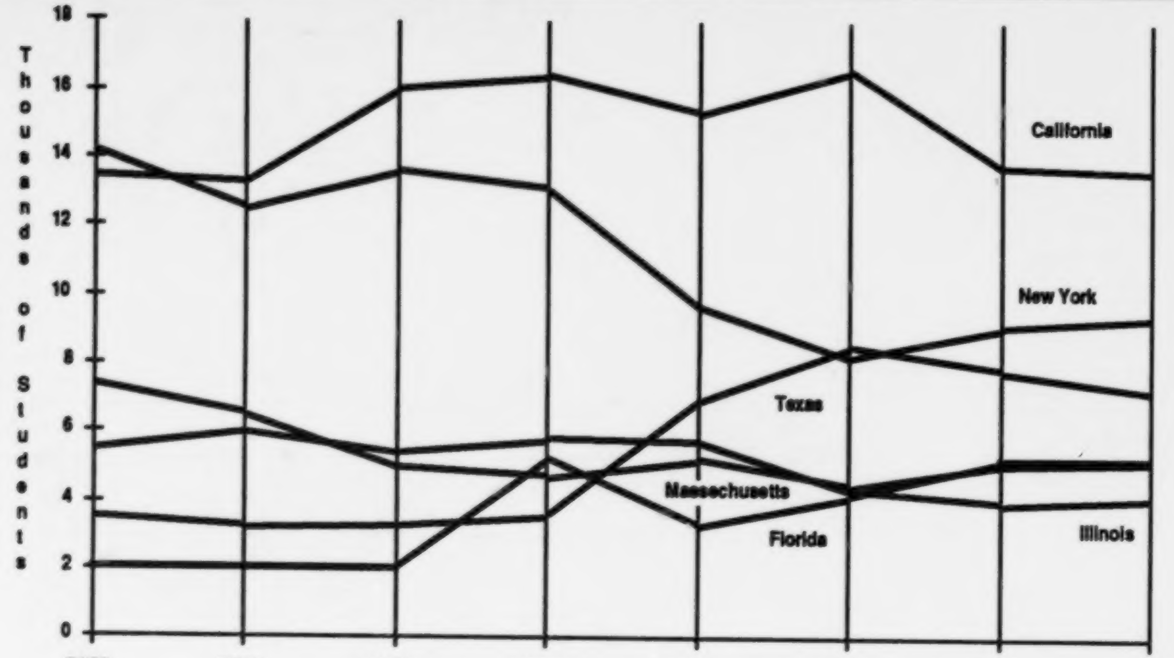
5.D

Foreign Student Enrollments In States With the Most Foreign Students, 1954/55-1986/87



in the Pacific (59.4%) regions came from South and East Asia. In the Mountain region, South and East Asians (42.7%) and Middle Easterners (15.8%) made up over half of the foreign student population. Of the students enrolled in U.S. territories (the "other" category), 60.9% were from Oceania.

DISTRIBUTION BY U.S. STATE

The number of foreign students reported in each U.S. state and territory in 1986/87 is listed in **Table 5.5,** along with figures for 1985/86 and the percentage change. The distribution among states is illustrated in **Figure 5.D.**

Although the overall increase in the number of foreign students was modest (1.7%), substantial changes in enrollments occurred in many U.S. states and territories. New York, New Jersey, and Illinois reported the largest numerical increases in foreign student enrollments. New York gained 1,461 students, representing a 4.7% increase over the previous year; New Jersey gained 1,318 students, 18.7% more than in the previous year; and Illinois gained 1,186, an 8.9% increase. The Virgin Islands (47.9%) and New Hampshire (27.0%) experienced the largest percentage increases in foreign students, reflecting gains of 78 and 252 students respectively. Prominent among states that lost foreign students last year were Texas, which had 1,750, (6.5%), fewer students than in 1985/86, and Louisiana with 1,087 (12.2%) fewer students. The largest percentage decrease in foreign students was reported by Puerto Rico with a loss of 90 students (13.2%).

Leading States On **Table 5.6** are shown the 10 states with the largest foreign student populations. California again reported the highest enrollment with 47,388 foreign students, representing 13.6% of the total foreign student population. New York, with 32,281 students (9.4%), and Texas, with 25,125 students (7.2%), were the second and third most populous states. Fourth-ranked Massachusetts had 18,227 (5.2%) and fifth-ranked Florida had 18,185

(5.2%). Nine of the 10 leading states in 1986/87 have been on the list since 1955. States included on the list have not changed since 1966/67, when Florida replaced Indiana.

The ranking of the top 10 states has fluctuated over the years (**Table 5.6** and **Figure 5.E**), with several changes occuring in 1980/81, when New York moved from third place into second, pushing Texas to third, and Florida jumped from sixth to fourth place. No changes occurred from 1980/81 to 1984/85, but in 1985/86, Ohio replaced Michigan as the state with the sixth largest foreign student population and last year Massachusetts replaced Florida as the state with the fourth largest foreign student population.

Leading Places of Origin **Table 5.7** and **Figure 5.F** present the proportions of students from each of the 10 leading countries or other places of origin in the 10 states with the highest enrollments. More than one-fifth of students from Hong Kong and Iran chose to study in California (28.3% and 21.7% respectively). Other places with relatively high percentages of their students in one state were Nigeria, with 20.6% of its students in Texas, and Taiwan, with 17.8% of its students in California. Although Michigan had only 3.5% of all foreign students in 1986/87, 13.8% of all Canadian foreign students were enrolled in that state. Similarly Illinois, with 4.1% of all foreign students, had 7.3% of all Malaysian students in the United States.

Number of Nationalities There were 186 nationalities represented among foreign students in the United States in 1986/87. New York reported the largest number of nationalities with 165, and California was a close second with 161. The District of Columbia had 157 reported nationalities, followed by Massachusetts with 151 (**Table 5.8**). Other leading states with large numbers of nationalities were Pennsylvania and Florida with 149; Texas with 147; and Illinois with 143.

Several states with fewer than 5,000 foreign students had nevertheless a nationally heterogeneous student body; large numbers of nationalities were represented in Kansas (130), Tennessee (118), and Alabama (118). States with fewer than 1,000 foreign students that reported a large number of nationalities in 1986/87 were Idaho (93) and Vermont (84). Overall, 35 states and the District of Columbia reported enrolling 100 or more nationalities in institutions of higher education in 1986/87.

6. DISTRIBUTION IN TWO- AND FOUR-YEAR INSTITUTIONS

ALL INSTITUTIONS

The vast majority of foreign students, 307,007 (87.8%), attended four-year institutions in 1986/87; only 42,602 (12.2%) were enrolled in two-year institutions. This distribution is very different from that of all higher education students in the United States, 60.2% of whom were in four-year and 39.8% in two-year schools (**Figure 6.A**).

Historically, the demand for two-year education by foreign students has not paralleled the demand by American students. As seen in **Table 6.0**, the proportion of foreign students enrolled in two-year institutions rose steadily from 10.6% in 1970/71 to a peak of 17.4% in 1979/80. However, in the 80's that share declined consistently, and for the past three years has levelled off at only about one eighth of all foreign students. In 1986/87, 12.2%, were attending two-year schools. In contrast, the percentage of all higher-education students enrolled in two-year institutions has continued to climb during the same period, from 26.0% in 1970/71 to 39.8% in 1986/87.

DISTRIBUTION BY STATE **Table 6.1** lists the numbers and percentages of foreign students in two- and four-year institutions for each state and territory in the

TABLE 6.0

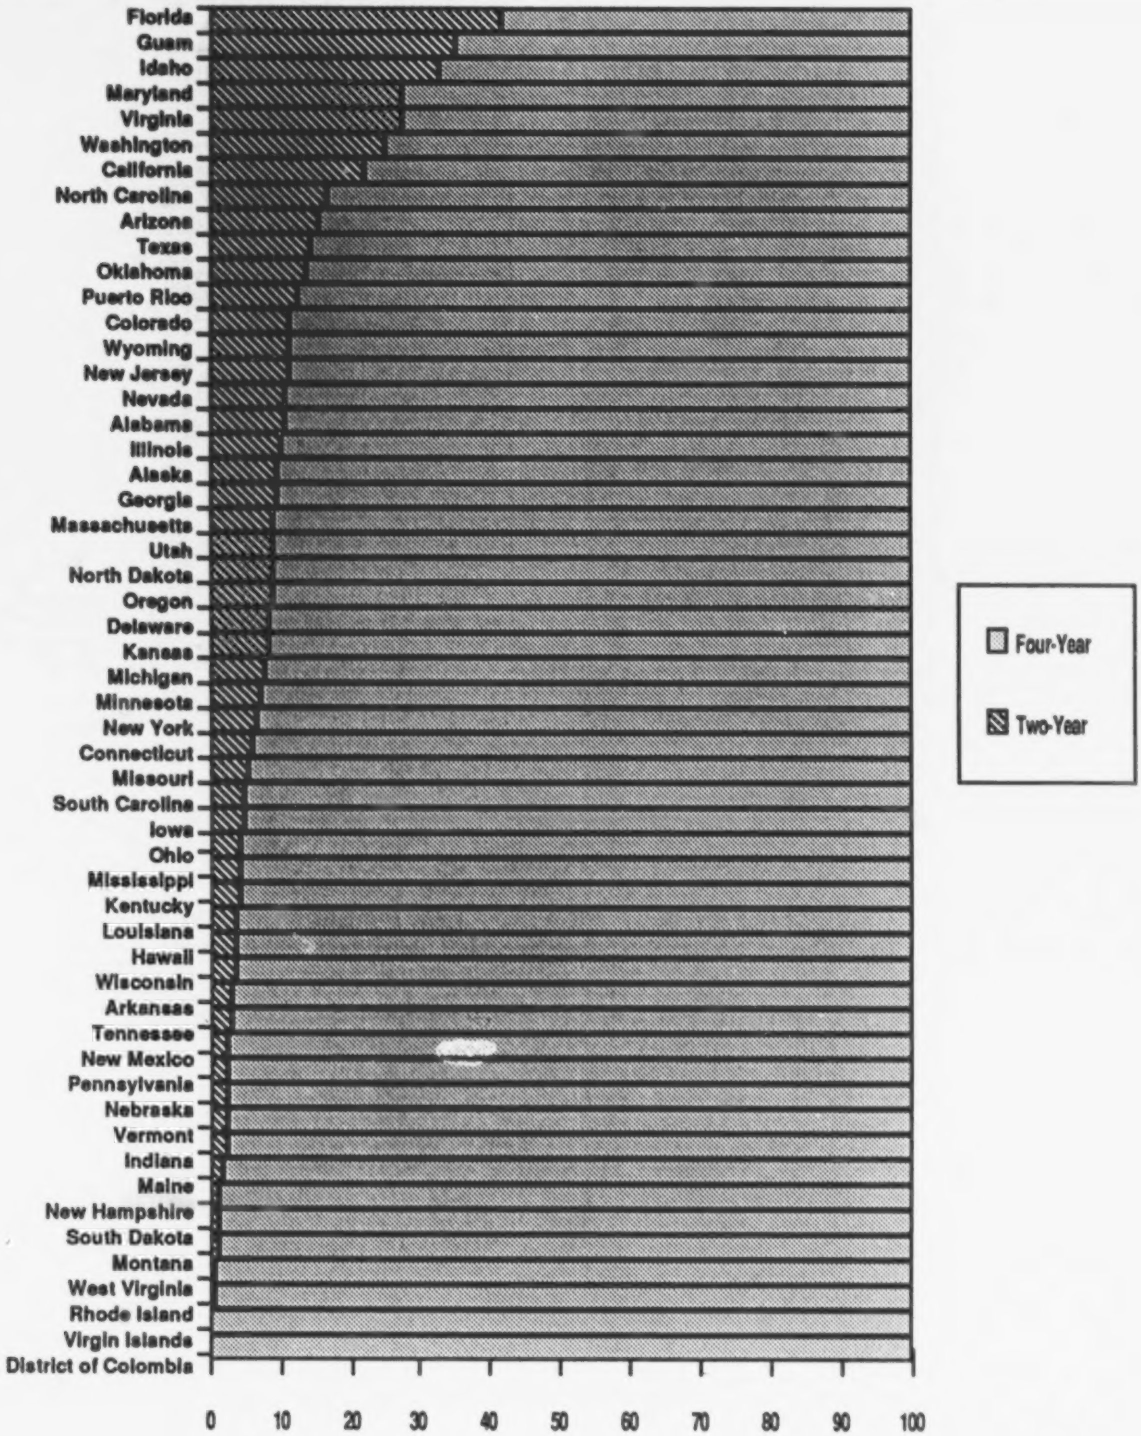
ALL STUDENTS

FOREIGN STUDENTS

6 B.
Foreign Studets in Two - and Four - Year Institutions by State, 1986/87



United States (illustrated in **Figure 6.B**). In 1986/87, several states or territories reported much larger percentages of foreign students in four-year institutions than the overall foreign student average of 87.8%: the District of Columbia and the Virgin Islands (100%), Rhode Island and West Virginia (99.6%), Montana (99.2%), and South Dakota (99.1%). Similarly, several states or territories reported much larger proportions of students attending two year insititutions than the overall foreign student average of 12.2%. Enrollments of students in two-year institutions were significantly larger in proportional terms than the overall foreign student average of 12.2% in Florida (41.4%), Guam (35.0%), and Idaho (32.6%).

World Region, Subregion and Leading Places of Origin The distribution of foreign students by world region, subregion, and leading country or other locality of origin in two- and four-year institutions is presented in **Table 6.2.** African students as a whole enrolled in four-year schools in greater proportions (91.0%) than the entire foreign student body (87.8%); however, relatively smaller proportions of students from Ethiopia and Morocco attended four-year institutions (77.8% and 77.5% respectively). Students from Western Europe also favored four-year institutions in above-average proportions (92.6%), while Eastern Europeans (86.7%) were enrolled in slightly below-average proportions.

With the exception of Brazil and Argentina, Latin Americans chose two-year institutions much more often than did foreign students overall (23.5% compared to 12.2%). This was especially true of Caribbean and Central American students, (28.9% and 28.4% respectively in two-year institutions). Large proportions of students from three countries were enrolled in such schools: 89.9% of the Cubans, 76.1% of the Nicaraguans, and 58.8% of the Haitians.

In 1986/87, students from the Middle East attended two-year institutions only slightly more often than students from other regions (14.5% compared to the overall average of 12.2%). However, students from Jordan and Kuwait showed comparatively higher-than-average preference for two-year institutions, 18.9% and 18.2% respectively.

Relatively few North American foreign students, most of whom are Canadians, attended two-year institutions (7.7%). The distribution of Oceanian students in two- and four-year institutions slightly favored two-year institutions. This is due to the fact that the Trust Territory of the Pacific Islands differed sharply from Oceania as a whole, with 26.7% of its students in two-year institutions. Australia and New Zealand both had fewer than 5% of their students in two-year institutions. The percentage of South and East Asian students in two-year institutions was below-average at 7.4% in 1986/87. Attendance in such schools was particularly low among students from Taiwan (2.6%), India (2.7%), Korea (2.9%), and Malaysia (3.0%). Exceptions for the region were Japan (16.8%) and Indonesia (14.7%).

TOTAL	32,100	75.3

Leading Countries or Other Places of Origin In 1986/87, the countries or other localities with the highest proportions of students in four-year institutions were Tunisia (98.3%), Algeria (98.1%), Taiwan (97.4%), India (97.3%), the Republic of Korea (97.1%), Malaysia (97.0%), and Yugoslavia (96.7%). Leading countries with the highest proportion of students in two-year institutions were Cuba (89.9%), Nicaragua (76.1%), Haiti (58.8%), and the Trust Territory of the Pacific Islands (26.7%) (**Table 6.2**).

TWO-YEAR INSTITUTIONS

Distribution by State The number of foreign students attending two-year schools in the United States rose last year after several years of continuous decline. However, their share of the foreign student body remained unchanged as enrollments increased in four-year schools as well. In 1986/87, there were 42,602 foreign students in two-year institutions, an increase of 829 students or 2.0% from the previous year (**Table 6.3**). California was the state with by far the most foreign students in two-year institutions, enrolling nearly one quarter of them (24.4%). Florida also had a relatively large share of all two-year students (17.7%), and Texas was the only other state with substantial numbers of students in two-year institutions, capturing 8.2% (**Table 6.4**). Nine states with more than 1,000 two-year enrollments accounted for nearly three-quarters of all foreign students in two-year institutions.

Gains and Losses Twenty-four states or territories experienced a decrease in the number of two-year foreign students, 28 showed an increase, and two showed have no two-year institution (**Table 6.3**). The states with the largest numerical losses in foreign student enrollment in two-year institutions since 1985/86 were Maryland, which lost 361 students; Virginia, which lost 301 students; and Oklahoma, which lost 172 students. Of the states with more than 100 two-year students, Louisiana (24.8%), Georgia (18.4%), and Virginia (15.8%) experienced the largest percentage losses.

Wisconsin (102.2%) Kansas (37.7%), and Oregon

% of All Two-Year Institutions			26.9[1]	27.2	
TOTAL, ALL TWO-YEAR INSTITUTIONS			41,77342,602	2.0	

[1] *Totals are for the ten leading two-year institutions of 1985/86 which included Prince Georges College (ranked fourth) and Broward Community College (ranked Tenth).*

(33.2%) reported the greatest percentage gains of the states with more than 100 two-year students. Among the ten leading states, the largest proportional gain occurred in Washington (29.9% or 339 students) and the largest loss in Maryland (17.6% or 361 students).

Two-year Institutions with the Most Foreign Students (Table 6.5) lists the two-year institutions reporting the largest enrollments of foreign students in 1986/87 and compares these with 1985/86 rankings. Though there were several changes, Miami-Dade Community College, with an enrollment of 5,010, a 5.9% increase over its 1985/86 total, again had the most foreign students. The number of foreign students attending Miami-Dade was more than three times larger than the 1,481 foreign student enrollment at second-ranked Northern Virginia Community College, which lost 16.5% of its enrollment last year. Bunker Hill Community College had the third highest enrollment in 1986/87 as it did in the previous year, with 826 students. Montgomery Community College, was in fourth place, with 818 students, while Santa Monica College rose from ninth to fifth place, with an enrollment of 639. San Antonio College, Loop College, Los Angeles City College, Pima Community College, and Central Piedmont Community College ranked sixth to tenth respectively. San Antonio College and Pima Community College replaced Prince Georges Community College, which ranked fourth and Broward Community College, which ranked tenth in 1985/86.

As in previous years, the 10 largest institutions continued to account for a substantial proportion (27.2%) of foreign students in two-year institutions. Miami-Dade Community College alone accounted for 11.7%.

FOUR-YEAR INSTITUTIONS

Distribution by State The number of foreign students attending four-year institutions rose from 302,004 in 1985/86 to 307,007 in 1986/87, a 1.7% increase. Four-year student distribution among the states and territories of the U.S. ranged from a low of 240 in Alaska to a high of 37,004 in California (**Table 6.6**). The states with the highest foreign student enrollment in four-year institutions were California with 12.1% of all four-year students; New York, with 30,839 students (10.0%) and Texas with 21,639 students (7.0%) (Table 6.8). Nearly six out of ten foreign students (57.0%) attending four-year schools were concentrated in the 10 states which had the largest foreign student enrollments.

Gains and Losses Foreign student enrollments in four-year institutions were higher in 1986/87 than in the previous year, in 39 states or territories and lower in 15 states or territories. Most prominent of the states that experienced a large decline in the number of four-year foreign students was Texas, which lost 1,867 students in last year. Other states with lower enrollments were Louisiana, with 999 fewer students than in the previous year; California, with 384 fewer students; and Oklahoma with 214 fewer students. Puerto Rico (23.4%), Delaware (12.7%) and Louisiana (11.7%) had the largest percentage decreases, reflecting the loss of 160, 94, and 999 students, respectively.

States with the largest increases in foreign students in four-year institutions were New Jersey, with 1,332 additional students; New York, with 1,258 more students; and Illinois, with 1,016 more students. The greatest percent-

age increases in enrollments at four-year institutions were reported by the Virgin Islands with an increase of 78 students (47.9%) and New Hampshire with 249 more students (27.0%).

Leading Institutions Table 6.8 ranks the 10 four-year institutions reporting the largest enrollments of foreign students in 1986/87 and compares these figures with data from 1985/86. The University of Southern California remained first with 3,746 foreign students in 1986/87. The University of Texas at Austin retained second place with 3,000 students. Columbia University jumped from fifth to third place with 2,807, pushing the University of Wisconsin-Madison and Ohio State University, Main Campus with 2,789 and 2,739 respectively, down to the fourth and fifth spots. The University of Minnesota-Twin Cities moved from eighth to sixth with 2,642, while seventh place was retained by the University of California, Los Angeles. The sole newcomer to the top ten was the University of Arizona in tenth place, which replaced last year's number nine, the University of Houston. The ten institutions with the highest enrollments accounted for 8.9% of all foreign students attending four-year schools, indicating very wide distribution of four-year foreign students.

7. DISTRIBUTION IN PUBLIC AND PRIVATE INSTITUTIONS

ALL INSTITUTIONS

Approximately two-thirds of the foreign students in the United States, 227,650 students or 65.1%, attended public institutions and a little more than a third, 121,959 students or (34.9%), attended private institutions. These proportions differed significantly from those of the U.S. higher education student population as a whole, more than three quarters (78.2%) of which attended public institutions (**Table 7.0** and **Figure 7.A**). In the past ten years there have been no significant changes in the shares of foreign students and all students attending public and private schools.

Distribution by State The distribution of foreign students in public and private institutions varied widely from state to state last year (**Table 7.1** and **Figure 7.B**). Proportions of foreign students much higher than the U.S. average of 78.2% were found in public institutions in Wyoming, Guam, and the Virgin Islands (100% each), Nevada (99.2%), North Dakota (97.9%), New Mexico (97.6%), Delaware (94.2%), Mississippi (92.7%), and Arizona (91.9%). In contrast, in some states and in the District of Columbia, the students who attended private institutions outnumbered those in public institutions. In 1986/87 the District of Columbia reported the highest proportion of foreign students (87.9%) in private institutions followed by the New England states of Vermont (78.9%), Massachusetts (78.0%), New Hampshire (70.9%), Connecticut (70.1%), Rhode Island (70.2%), and then by New York (58.6%), Hawaii (54.4%), Puerto Rico (54.2%), and Pennsylvania (52.9%).

World Region of origin and Subregion The distribution of foreign students in public and private institutions by world region, subregion, and leading country of origin for

TABLE 7.0

Foreign Students and All Students in Public and Private Institutions, 1975/76-1986/87

Year	Foreign Students		All Students[1]	
	Public	Private	Public	Private

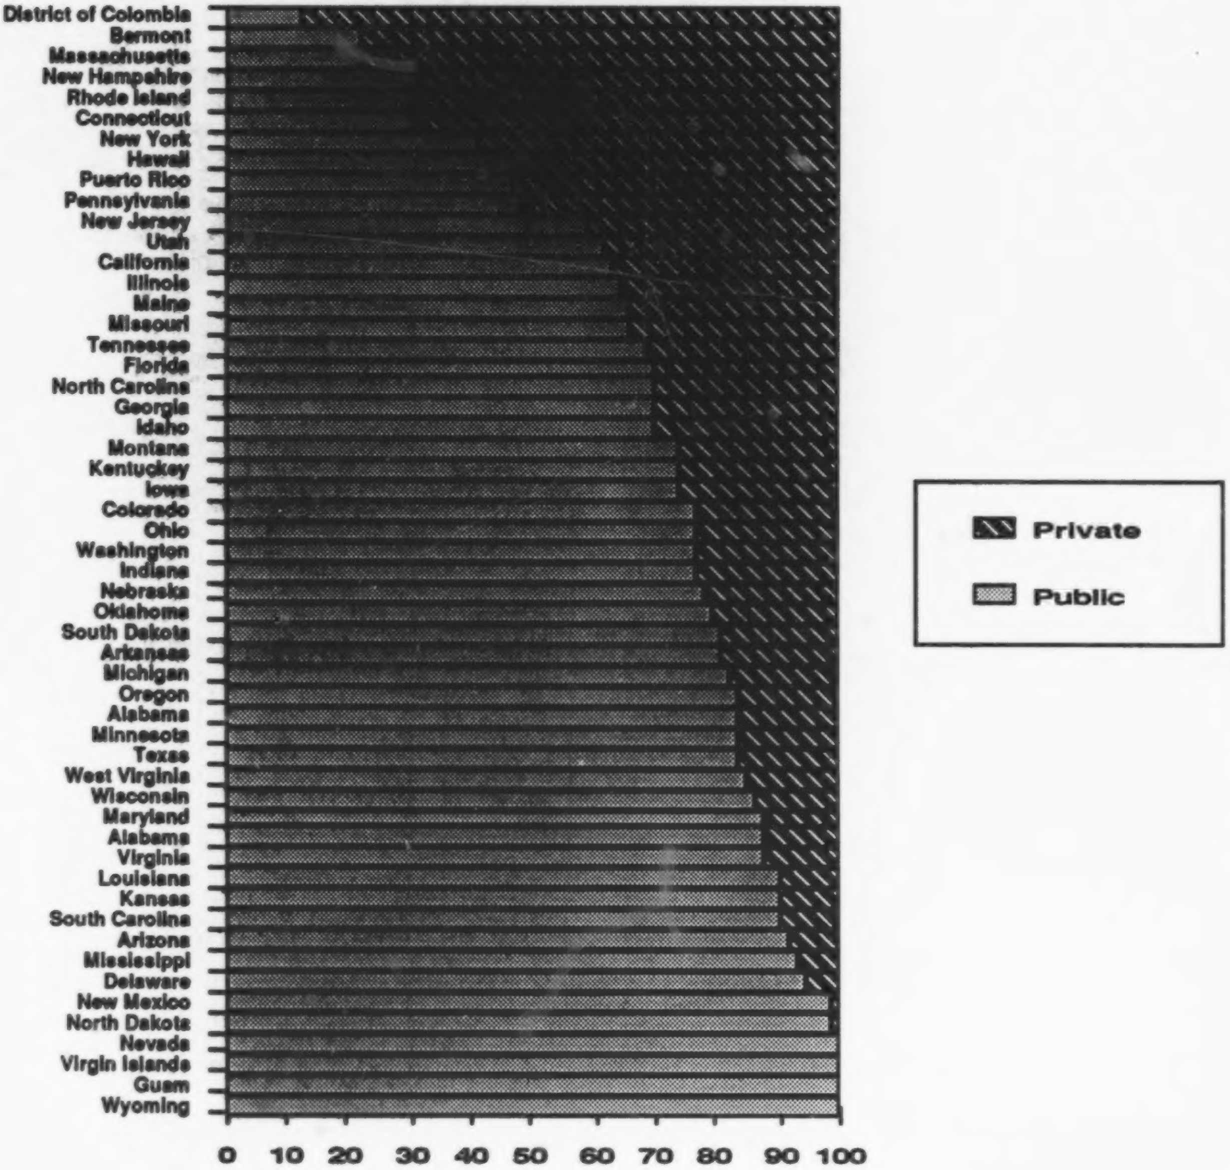
7.B
Foreign Students in Public and Private Institutions by State, 1986/87



the last three years appears in **Table 7.2**. The data show that slightly more Middle Easterners, and South and East Asians were attending public schools in 1986/87 than the overall foreign student average. In contrast, disproportionately more Western European, North American, and Oceanian students were in private schools. The proportions of students from Africa, Eastern Europe, and Latin America who chose public and private schools were similar to those of all foreign students, although a higher-than-average percentage of Caribbeans and a lower-than-average percentage of North Africans and Central Americans attended private institutions.

Leading Countries or other Places of Origin Although at least a substantial share of students from all leading countries and other places of origin were enrolled in private institutions, that share differed significantly (**Table 7.2**). Among leading places of origin in 1986/87, the following had more than half of their students attending private institutions: Bermuda (68.3%), the Bahamas (53.2%), New Zealand (52.6%), Canada (51.9%), Trinidad and Tobago (51.8%) and Australia (51.3%). Other major sending countries with relatively high proportions of students in private schools were Jamaica (49.5%), France (47.5%), the Philippines (46.1%), South Africa (46.8%), and Algeria (45.2%). Countries with more than 80% of their students in public institutions included Cuba (94.7%), Nicaragua (89.6%), Tunisia (80.9%), and Sudan (80.7%).

PUBLIC INSTITUTIONS

Distribution by State The number of foreign students attending U.S. public institutions in 1986/87 was slightly higher than in the previous year. There were 3,239 more students in such institutions last year, an increase of 1.4% over 1985/86. Five states reported more than 10,000 foreign students enrolled in public institutions; nine states reported between 5,000 and 9,999 foreign students; 25 states reported between 1,000 and 4,999 foreign students; and 15 states and territories reported fewer than 999 foreign students enrolled in public institutions (**Table 7.4**).

Approximately one eighth of all foreign students in public institutions (29,507 students or 13.0%) were attending schools in California and an additional one tenth (21,003 students or 9.2%) were in Texas (**Table 7.4**). Substantially smaller numbers of students were enrolled in the next eight leading states, ranging from 13,593 students in New York to 5,621 students in Oklahoma. Together these 10 states accounted for 54.6% of all foreign students enrolled in U.S. public institutions in 1986/87.

Gains and Losses The largest increase in enrollment in public schools occurred in New York, which received an additional 934 students in 1986/87. Rounding out the top five were Illinois, adding 565 students; New Jersey, adding 544 students; Oregon, adding 439 students; and Washington, adding 413 students. The states

TABLE 7.4

States With the Most Foreign Students in Public Institutions and Percentage Share, 1986/87

State	Foreign Students	% of Total
California	29,507	13.0
Texas	21,003	9.2
New York	13,593	6.0
Florida	12,660	5.6
Michigan	10,055	4.4
Ohio	9,804	4.3
Illinois	9,353	4.1
Louisiana	7,017	3.1
Pennsylvania	5,752	2.5
Oklahoma	5,621	2.5
TOTAL	124,365	54.6

with the largest percentage increases included New Hampshire with 162 more students (88.5%); the Virgin Islands with 78 more students (47.9%) and Maine with 76 more students (34.9%).

Texas again reported the largest drop in foreign student public enrollments with 1,491 (6.6%) fewer students than in the previous year, while Louisiana, which had shown a slight increase in 1985/86, registered an absolute drop of 1,083 (13.4%). The only other states to lose more than 100 students in public institutions were Oklahoma (361), Maryland (184), and California (115).

Countercyclical Movement The following five states experienced declining numbers of foreign students in public institutions despite overall gains in total foreign student enrollments in those states: Hawaii, Idaho, Indiana, Kentucky, and Wisconsin. At the same time, South Dakota and Puerto Rico had lower total enrollments but higher enrollments in public schools, than in the previous year.

Public Institutions with the Most Foreign Students Table 7.5 lists the public institutions with the largest foreign student enrollments in 1985/86 and 1986/87. Again, Miami-Dade Community College was first last year with 5,010 foreign students, 280 more than in the previous year. The University of Texas at Austin, despite its declining enrollment of foreign students, maintained second place, with 3,000 students, and the University of Wisconsin-Madison, with 2,789 students, was again in third place. The public institution that reported the largest percentage increase in enrollment (6.1%) was the University of Minnesota, Twin Cities, an increase of 151 students, while the University of Houston was the public institution with the largest drop (7.2%), a loss of 176 students. The

Total, 10 Leading Public Institutions			27,930[1]	28,091	0.6
% of All Public Institutions			12.4[1]	12.3	
TOTAL, ALL PUBLIC INSTITUTIONS			224,411	227,650	1.4

[1] *Totals are for the leading public institutions of 1985/86, which included North Texas State University (ranked ninth).*

10 leading public institutions accounted for 12.3% of all foreign students enrolled in public institutions in 1986/87. North Texas State University, which ranked ninth in 1985/86, was replaced by The University of Arizona in 1986/87.

PRIVATE INSTITUTIONS

Distribution by State The number of foreign students attending private institutions rose by 2,593 in 1986/87, bringing the total to 121,959 (**Table 7.6**). Enrollment size varied from state to state, with three states having more than 10,000 students in private institutions. Three states and the District of Columbia had enrollments of between 5,000 and 9,999 students; 18 states had between 1,000 and 4,999 students; 26 states and territories had fewer than 999; and three had no students in private schools (**Table 7.6**). New York, California, Massachusetts, and the District of Columbia accounted for approximately half of all students attending private institutions in the U.S., attracting 15.8%, 14.7%, 11.7%, and 7.0% of the foreign students respectively (**Table 7.7**). The 10 leading states enrolled 71.8% of all foreign students attending private institutions in 1986/87.

Gains and Losses There were not many substantial within-state changes in the numbers of foreign students in private schools from1985/86 to 1986/87. New Jersey, which experienced the largest numerical increase in enrollment in private institutions, gained 774 students, while Illinois and New York, the only other states with significant increases, gained 621 and 527 students respectively (**Table 7.7**). Alaska experienced the largest percentage increase, 66.7%, a real gain of only 18 students, followed by New Jersey, with a 29.1% increase.

The largest numerical decreases in enrollment occurred in Texas, where private institutions enrolled 259 fewer foreign students; Michigan, which lost 188 students; and Washington, which lost 170 students in 1986/87. Large percentage decreases were experienced by Nevada with a loss of 4 students (44.4%), and Mississippi with a loss of 46 students (27.1%)

Countercyclical Movement Because of the smaller numbers of foreign students in private schools, many states displayed countercyclical trends. Those with fewer private school foreign students, despite overall foreign student gains, include Alabama, Connecticut, Iowa, Maine, Michigan, Mississippi, Nevada, North Carolina, Oregon, South Carolina, and Washington. The opposite was true for Maryland and Tennessee.

Private Institutions with the Most Foreign Students Of the 10 private institutions with the largest numbers of foreign students in 1986/87, eight were located in Northeastern cities: three in Boston, two in New York

City, two in the District of Columbia, and one in Philadelphia (Table 7.8). However, the University of Southern California continued to enroll the most foreign students, 3,746 in 1986/87. Second - and third-ranked Columbia University and Boston University reported enrollments of 2,807 and 2,422 students respectively. Boston University reported the largest percentage decrease in the top ten with 71 fewer students (2.8%), while Stanford University experienced the largest percentage increase gaining 407 students (22.9%). The 10 private institutions with the highest foreign student enrollments accounted for approximately one fifth (19.4%) of all foreign students attending private institutions in 1986/87. The University of Miami, which had ranked ninth, was replaced in 1986/87 by Stanford University.

8. INSTITUTIONS WITH THE MOST FOREIGN STUDENTS

In 1986/87, 85 institutions in the United States reported enrolling 1,000 or more foreign students (**Table 8.0**), seven more than in the previous year. This represents a big change since 1954/55 when only one U.S. institution enrolled over 1,000 students. These institutions accounted for 147,259 foreign students, or 42.1% of the foreign student population in the United States. The share of total enrollment composed of foreign students varied from institution to institution: it ranged from a low of 3.7% at Rutgers University, New Brunswick, to a high of 19.6% at the Massachusetts Institute of Technology, with an average among the leading institutions of 7.2%. The foreign student enrollment in each U.S. institution surveyed is listed in ***Appendix A1***.

The 10 institutions reporting the largest number of foreign students remained fairly stable until the mid 1970s—seven of the 10 institutions listed in 1954/55 appeared on the list in 1974/75 (**Table 8.1**). Greater changes occurred in the last few years, leaving only three of the original 10 institutions consistently included: the University of Southern California, Columbia University (including Barnard and Teachers Colleges), and the University of Wisconsin-Madison.

The proportion of foreign students enrolled in leading institutions has been relatively stable in recent years (**Table 8.3**), following a downward trend that began in the 1960s. In 1959/60, the 10 leading institutions reported 22.8% of all foreign students. By 1980/81, the top 10 institutions accounted for only 8.3% of the foreign student population and this proportion has remained just below 9% (8.6% in 1986/87) since then.

1986/87	17,352	5.0	30,092	8.6	52,313	15.0

While the overall proportion of foreign students enrolled in U.S. institutions of higher education was 2.8%, a number of institutions with 1,000 or more foreign students had much higher concentrations of foreign students. Institutions with the largest proportions of foreign students appear in **Table 8.2** and are illustrated in **Figure 8.A**.

Among the 10 institutions with the highest foreign student enrollments, four appear in **Table 8.2** as institutions with high proportions of foreign students among their total student populations: Miami-Dade Community College (12.5%), the University of Southern California (12.2%), Columbia University, Barnard and Teachers College (11.3%), and Boston University (10.5%).

Twenty institutions, (**Table 8.4**) led by George Washington University and American University, which reported 117 nationalities among their foreign students,enrolled students from 100 or more nations.

9. ACADEMIC LEVEL BREAKDOWNS

Starting with the 1985/86 academic year, IIE began asking institutions to provide academic level breakdowns for each of the foreign student characteristics appearing on the Institutional Data form. Institutions reported, for example, the number of students from a specific country or in a specific field of study enrolled as graduate students, undergraduates or "other", a category which includes practical training, non-degree programs, and Intensive English Language programs.

Not all institutions which responded to the census were able to provide academic level breakdowns. As indicated in **Table 9.1**, depending on the student characteristic involved detailed academic level information is available for as many as 70.1% and as few as 42.8% of the enrolled students. Therefore, in this chapter, unlike the rest of *Open Doors* analyses are based on a sample rather than on the entire reported foreign student population. For this reason, only percentage distributions are presented here.

However, it is possible to estimate the total number of graduate, undergraduate and other students in specific categories. This can be done by applying the percentages in this chapter to total found in other chapters of *Open Doors.* For example, **Table 9.2** indicates that 36.8% of all African students are graduate students; this percentage may be applied to the total number of African students in **Table 2.0** in chapter 2, producing approximate figures on the total numbers of African graduate students (.368 x 31,580 = 11,621 African graduate students).

CHARACTERISTICS OF FOREIGN STUDENTS BY ACADEMIC LEVEL

Region, Subregion, and Country or Other Place of Origin Presented in **Table 9.2** and **Figure 9.A** are the academic levels of students from the major world regions, subregions, and leading countries or other places of origin. It shows that Latin America sent the highest percentage of undergraduates (71.6%); this is particularly true of the Caribbean (85.0%) and Central American (72.0%) subregions. Other areas with high proportions of undergraduates were Southeast Asia (71.9%), Sub Saharan Africa (65.7%), and the Middle East (65.1%).

Graduate students came in relatively high proportions from South and East Asia (50.6%) and Europe (42.4%). Subregions with high graduate student proportions were East Asia (61.2%), South Central Asia (61.0%), and North Africa (58.7%).

Within regions, the distribution by academic level of students from the leading countries or other places of origin varied widely. For instance, while the average percentage of undergraduates from South America was 63.8%, 75.5% of the Venezuelan students were studying at this level, but only 40.3% of the Argentinean students were. For East Asia overall, 61.2% of the students were at the graduate level; however, over three-quarters of the students from Taiwan (78.3%), and only 26.0% of the Japanese students, studied in the United States at this level. In Southeast Asia, 80.7% of Malaysian students were undergraduates, but only 40.0% of Thai students.

TABLE 9.1

Proportion of Foreign Students for whom Academic Level Breakdowns Were Provided

Characteristic	% Return
World Region of Origin	69.7
Field of Study	70.1
Primary Source of Funds	42.8
Gender	59.8
Marital Status	68.6
Enrollment Status	43.9
Visa Type	68.5

The countries that sent the highest proportions of undergraduates were the Pacific Island Trust Territories (97.7%), Cuba (96.8%), Nicaragua (93.5%), the Bahamas (91.8%), Bermuda (91.1%), Haiti (90.9%), Trinidad and Tobago (83.8%), Panama (81.6%), Honduras (80.7%), Malaysia (80.7%), and Ethiopia (80.4%). Places with the highest percentages of graduate students include Algeria (86.2%), Taiwan (78.3%), China 77.2%), India (74.0%), and the Republic of Korea (70.6%).

Field of Study Seven of ten (70.2%) of all foreign students in agriculture were involved in graduate level work, as were two-thirds of the students in education (65.2%) andin the physical and life sciences (66.8%). The humanities (68.4%) and the social sciences (59.3%) also displayed a preponderance of graduate students.

In contrast, 68.2% of all foreign business and management students and 57.6% of those in mathematics and computer science were undergraduates. Undergraduates were also a majority in engineering (54.8%), in fine and applied arts (62.1%), and in health sciences (50.1%). The vast majority of students (68.6%) in all other fields of study were also undergraduates, as were, quite understandably, 82.4% of those students who had not yet declared a fied of study.(**Table 9.3** and **Figure 9.B**)

Primary Source of Funding The primary funding source of foreign undergraduates and graduate students differed to a considerable degree (**Table 9.4**). Three-quarters (72.6%) of those who relied on personal and family funding were studying at the undergraduate level, while funds from U.S. colleges and universities supported primarily graduate students (74.3%).

Gender A sizable majority of female foreign students (60.6%) were undergraduates (**Table 9.5**), with males more evenly divided between graduate (43.9%) and undergraduate (52.4%) students. Of the female foreign students 5.2% fell in the "other" category as against 3.7% of the male foreign students.

Singapore	79.8	18.9	1.3
Philippines	52.6	43.1	4.3
YEAR TOTAL	**54.5**	**41.3**	**4.2**

Marital Status Not surprisingly, a greater proportion of married students were graduate students than undergraduates (**Table 9.6**). In fact, almost two-thirds of all married students were at the graduate level, while almost the same proportion of single students were undergraduates.

Enrollment Status A majority of both full and part-time students were undergraduates, with a larger percentage of part-time students in the "other" academic level category (**Table 9.7**).

Visa Type A majority of all visa types, with the exception of J visas, were held by undergraduates (**Table 9.8**). Thus, 59.5% of all students with F visas and 92.4% of all students with refugee status were undergraduates, as were over 90% of M visa holders. In contrast, 72.5% of all J visa holders were graduate students.

CHARACTERISTICS OF FOREIGN STUDENTS WITHIN ACADEMIC LEVEL

The detailed data on academic level permit not only analyses of various foreign student characteristics by

academic level (i.e., what proportion of African students are studying at the graduate and undergraduate level) but also analysis of the distribution within the several academic levels of students (i.e., what proportion of the total foreign graduate student population comes from Africa). Other characteristics within academic level that will be examined are primary funding sources, visa type, gender, and marital and enrollment status.

Region and Subregion of Origin South and East Asia, the region of origin of 48.8% of all foreign students, contributed the largest percentages of foreign undergraduates (40.0%) (**Table 9.9**). There were noticeable subregional differences: the subregion of southeast Asia led the way, supplying 18.6% of all undergraduate foreign students, while East Asia supplied 15.9% of all undergraduates. The Middle East (15.9%) and Latin America (16.9%) were next, while Africa and Europe each sent about (9.9%).

South and East Asia dominated as a source of graduate students to an even larger degree than as a source of undergraduates. Of all graduate students, 59.0% were from that region, with 38.3% from East Asia. The largest differences between graduate and undergraduate proportions for any region emerged for Latin America, which sent 16.9% of the world's undergraduates but only 7.4% of the graduate students, and for the Middle East, which supplied 15.9% of the undergraduate students but only 9.8% of the graduate students.

Field of Study The most popular fields of study among undergraduate foreign students were business and management, which enrolled 24.6% of all students, and engineering, which enrolled 21.3% (**Table 9.10**). The proportion of foreign undergraduates studying business and management was considerably higher than the proportion of graduate students (13.9%), while the percentage of students in engineering was similar for both academic levels. In contrast, over two and one-half times as many graduate students (12.6%) as undergraduates (4.7%) studied physical and life sciences, and graduate enrollments in the humanities (6.4%) were three times higher than undergraduate enrollments (2.1%).

Primary Source of Funds Three-quarters (75.0%) of all undergraduate foreign students were supported through personal and/or family funds (**Table 9.11**), as opposed to the 44.3% of graduate students who received their primary support from these sources. U.S. colleges and universities funded a much higher percentage of graduate students than undergraduates (32.1% compared to 5.9%). Students defined as "other" (in non-degree, practical training or Intensive English Language programs) were largely supported by private family funds (53.2%) or current employment (18.5%).

Visa Type and Enrollment Status The vast majority of undergraduates (85.4%) were studying on F visas in 1986/87, and 4.5% were refugees (**Table 9.12**). All but 9.2% of them were enrolled in full-time programs (**Table 9.13**). Among graduate students, three-quarters were on F visas, but a significant proportion (about one-fifth, 20.2%) were on J visas, compared to a mere 3.9% of undergraduates. Only a minuscule percentage of graduate students were refugees (0.2%). Like undergraduates, most (90.0%) were in full-time programs; only 10.0% were studying part-time.

Gender and Marital Status Two-thirds (64.9%) of foreign students at the undergraduate level were men, as against almost three-quarters (73.3%) of graduate students (**Table 9.14**). Not surprisingly, nine-tenths of undergraduates (90.8%) were single, compared to only 65.7% of graduate students (**Table 9.15**).

Part II: COST-OF-LIVING EXPENDITURES BY FOREIGN STUDENTS IN THE U.S.

Presented here are estimated cost-of-living expenditures by foreign students in the United States based on information from two sources: 1) the number of foreign students reported for 1986/87 in the Annual Census and 2) the recommended Monthly Maintenance Rates (MMRs) for 1987/88 produced by IIE for use by the Fulbright scholarship program.

The MMRs are based on Bureau of Labor Statistics estimates of intermediate-level family budgets and comparative indices of prices in selected urban areas, with adjustments to reflect inflation and special foreign student needs. Since living costs vary in different regions of the United States and between urban and nonmetropolitan areas, IIE has located each institution within its appropriate geographical area, thereby providing it with a specific MMR. It should be noted that the MMR includes living costs only; it does not include expenditures for tuition, fees, books, insurance, special equipment, travel, or dependents.

Table 10.0 estimates the cost-of-living expenditures by foreign students in each state. To do this, the MMR is multiplied by nine (representing a nine-month academic year), then multiplied by the number of foreign students reported in each institution in a state. The estimated expenditures for each institution is a state are then totaled to arrive at a state figure. Although MMRs change from regfion to region the average MMR for 1987/88 is $675. **Table 10.1** provides similar estimated expenditures for selected metropolitan areas using the specific MMR for that region. **Figure 10.A** illustrates the estimated expenditures by foreign students in the ten states with the highest expenditure figures.

Part III: INTENSIVE ENGLISH LANGUAGE PROGRAMS

BACKGROUND

In the late 1970s, upon the recommendation of the Interassociational Committee on Data Collection (ICDC), IIE conducted an exploratory survey to determine the number of nonimmigrant foreign students enrolled in Intensive English Language Programs (IELPs).The results of that survey, presented in *Open Doors 1978/79,* indicated that a significant nubmer of foreign students enrolled in these IELPs. Since these student constitute a substantial pool for entry into full-time academic programs, IIE began to survey IELP's on an annual basis.

TABLE 11.0

Foreign Student Enrollment and Intensive English Language Programs Reporting, Fall 1978/79-1986/87

Year	Foreign IELP Students	Number of Programs
1978/79	23,607	163
1979/80	20,243	190
1980/81	22,897	238
1981/82	32,224	305
1982/83	30,135	314
1983/84	25,246	308
1984/85	25,414	352
1985/86	23,956	337
1986/87	25,044	306

THE SURVEY

Using *English Language and Orientation Programs in the United States,* New York, IIE 1984) as a directory of IELPs IIE surveyed 403 programs offering a minimum of 15 hours of classroom instruction per week, 18 fewer than in 1985/86. (A list of the IELPs surveyed appears in **Appendix A8**). Officials connected with each program were asked to report the total number of foreign students enrolled during the fall of I986, their gender, visa type, and country or other place of origin, and to indicate whether information on these students was also reported in the Census.

RESULTS

IIE received 319 responses to the survey. A total of 306 institutions reported enrolling foreign students in Intensive English Language Programs; of the remaining 13, 11 reported enrolling no foreign students and two reported offering summer programs only.

Table 11.0 summarizes the basic findings of last year's survey, with comparable results from past surveys. The number of programs reporting foreign student enrollments decreased by 9.2%, from 337 in 1985/86 to 306 in 1986/87. However, the number of foreign students enrolled in IELPs rose considerably, from 23,956 in 1985/86 to 25,044 in 1986/87, an increase of 4.5% (**Figure 11.A**). The IELP students reported represented 7.2% of the total number of foreign students in 1986/87, up from 7.0% in 1985/86.

The number of programs that reported their students through the Annual Census dropped significantly from 177 in 1985/86 to 149 in 1986/87 (**Table 11.1**). These programs reported 9,955 foreign students, 843 (7.8%) fewer than in the previous year. The number of programs that reported enrollments only in the IELP survey declined marginally from 160 in 1985/86 to 157 in 1986/87. These IELPs enrolled 15,089 students, 1,931 (14.6%) more than in the previous year.

The Intensive English Language Programs reporting the highest foreign student enrollments are listed in **Table 11.2**. Montgomery College, Rockland/English as a Second Language led with 1,099 students. The second largest program was ptevious year's largest, Miami-Dade Community College/English as a Second Language, with 873 students, and Hunter College/International English Language Institute was third with 773 students. Other programs with relatively high enrollments were City College of Chicago, Loop College/English as a Second Language, which enrolled 596 students and Coastline Community College/Language Learning Institute, which enrolled 510 students. The 10 largest programs enrolled 5,579 students, comprising 22.2% of all students in IELPs.

Distribution by State Table 11.3 lists the states reporting the highest number of IELP students. Eight of the states with the most IELP students also have the highest enrollments of foreign students in general (see **Table 5.6**). The only exceptions were Washington and Louisiana which replace Pennsylvania and Michigan. Three of the top ten states reported increases in enrollment in IELPs in 1986/87. California and New York, the top two enrollers, added 295 and 203 students (7.0% and 8.1%) respectively. Louisiana entered the top ten by adding 232 students, a 45% increase. The largest percentage decrease was experienced by Texas, which lost 617 (35.6%) of its IELP students. Oddly, while the numbers of IELP students in the top ten states fell by 3.6%, the total number of students in these programs rose in 1986/87.

The distribution of foreign students in IELPs among the 47 states and the District of Columbia which reported foreign IELP students is presented in **Table 11.4**. The numbers of students included in the Annual Census and those not included in the Census are presented separately.

TABLE 11.4

TOTAL	9,955	15,089	25,044

Distribution was quite uneven, ranging from 11 students in Alaska to 4,531 in California. Five states had more than 1,000 IELP students.

Region and Country or Other Place of Origin

Table 11.5 shows the distribution of IELP students by region of origin in 1985/86 and 1986/87. It shows that almost half of the students (45.7%) were from South and East Asia, a proportion similar to that reported on the Census. Middle Easterners (17.8%) and Latin Americans (21.7%) were overrepresented in IELP programs, while Africans (4.4%), North Americans (0.4%), and Oceanians (0.8%) were underrepresented compared to all students from those regions.

The countries and other places that sent the largest number of IELP students in 1986/87, presented in **Table 11.6**, were substantially different from the leading coun-

[1] *Includes Eastern, Central, Southern and West Africa*

tries of origin reported in the Annual Census (**Table 2.5**). Commonwealth members such as India, Canada, Nigeria, and Hong Kong are not represented among IELP enrollments, since English is a language of instruction at home. In contrast, some non-English speaking countries like the Republic of Korea, China, Japan, and Indonesia sent relatively large numbers of both IELP students and foreign students overall.

Most IELP students in 1986/87 were from Japan (4,636, a 36.9% increase over last year's leading total); from China (1,507); from the Republic of Korea (1,324); and from Saudi Arabia (1,177). Six of the 10 leading places of origin of IELP students are in South and East Asia, two are in Latin America, and two are in the Middle East. Taiwan, whose students represented the largest number of foreign students in the overall foreign student population, had only 716 IELP students (2.9%).

The largest percentage increases in IELP enrollment occurred among students from Japan, with 1,250 students (36.9%), and from China with 342 more students (29.4%) . The countries that experienced the largest percentage decreases in IELP enrollment last year were: Korea, with 634 or 32.4% fewer students and Saudi Arabia, with 300 or 20.3% fewer students.

Personal Characteristics The percentage of male and female students in IELPs is illustrated in **Figure 11.B.** There were proportionately more women (40.1%) among IELP students than among foreign students reported in the Annual Census (31.1%), but the proportion of female IELP students increased a slight .8% from 1985/86.

Table 11.7 shows the visa type of IELP students. The proportions holding F and J visas in 1986/87 were somewhat lower than the proportions for all foreign students (see **Table 4.6**), while the proportions of refugees and those holding other visas were slightly higher. Definitions of the F, J, and M visas appear in the front of this book.

Part IV: STUDY ABROAD

BACKGROUND

The predominant direction of student mobility in the world today is from the countries of the Third World to the "host" or "receiving" countries of the West, as the previous chapters, especially chapter 1, have shown. There are also important outflows from these Western countries, both among these countries and to the rest of the world. Until 1986/87, the only source of data on student mobility from the United States to other countries was the Unesco *Statistical Yearbook*, of which extensive use was made in chapter I.

This year, for the first time since 1982/83, the Institute of International Education conducted an independent survey of the scale and composition of U.S. student flows. This survey was conducted in response to a considerable and growing U.S. higher education interest in patterns of study abroad and the significance they have in educational terms, primarily in the education of undergraduates but also for that of graduate students. It will be noticed that the figures in our tables differ from those in the Unesco data. This is because the Unesco sources report only students enrolled for degrees and thus do not count students in summer or semester programs in the host country.

While there is a large range of overseas opportunities in which U.S. students participate (study/travel tours, internships, practical training, etc.), the new study abroad survey conducted by IIE focuses specifically on study abroad for academic credit. It is intended to serve those who plan the efficient use of university and college resources, those who design undergraduate curricula and overseas programs, and those who need to understand how many and which kinds of students are presently and in the likely future obtaining a significant portion of their education at an institution in any foreign country. The study abroad population in this survey has been narrowly defined as only those students who received academic credit from a U. S. institution after they returned from their study abroad experience. It is not a survey of study abroad programs to determine the numbers of students enrolled in them and to obtain other information about them. IIE's *Academic Year Abroad* and *Vacation Study Abroad* provide detailed information on study programs worldwide for U.S. students. The numbers of students receiving academic credit are inevitably lower than the totals of those participating in study abroad programs of U.S. institutions and/or enrolled directly in foreign institutions of higher education. To date, no effective data collection strategy has been developed to capture the full picture of all U.S. students abroad: the current effort, although less than complete, offers the first comprehensive analysis of a major sector of the study abroad population.

In order to carry out the survey of U.S. study abroad, IIE engaged in extensive consultation with members of the Interassociational Committee on Data Collection (ICDC) and with administrators in the field of international education with special expertise in the field of study abroad. These discussions resulted in the design of a questionnaire that asked for information on five items: the total number of students at a given institution who received academic credit in the 1985/86 academic year for study abroad; the number of students who studied in particular countries; the

number of students in particular major fields of study; the number of students who studied abroad for different periods of time; and the number of males and females who studied abroad. IIE sent survey forms to the same university contacts used for the annual census of foreign students, with the request that they be passed on, if necessary, to a more appropriate campus official. With the same request, forms were also sent to a limited listing of study abroad coordinators maintained by IIE for its series of publications on study abroad programs.

Surveys were mailed to 2,896 institutions and responses were received from 1,898, for a response rate of 65.2% (**Table 12.0**). The institutions reported a total of 48,483 students who did receive academic credit from study in another country. Among them, 87.8% were enrolled in study abroad programs sponsored by U.S. institutions, 6.7% were directly enrolled in foreign schools, and 5.5% were in "other" types of programs.

GEOGRAPHIC DESTINATION

The vast majority of study abroad students chose to study in Western Europe: 76.8% of them studied there. Europe, as a whole, accounted for 79.6% of the total U.S. study abroad population. Lagging far behind Europe was Latin America, which accounted for 7.0% of the total population, and Asia, which received 5.4% of the total. The Middle East received 4.0% and Africa 1.1%.

LEADING COUNTRIES

Because of the concentration of foreign students in one region (Europe) it is most useful to examine the country destinations of American students in terms of the worldwide distribution of the study abroad population. The top 10 countries received eight out of ten Americans studying abroad (82.0%). The United Kingdom leads the way with 29.3% of all study abroad students, followed by France with 13.7%. The next eight countries were Spain (8.8%), Italy (7.8%), Germany, F.R. (6.1%), Mexico (4.2%), Israel (4.0%), Austria (3.9%), Japan (2.5%), and China (1.7%). All of the top five countries and six of the top ten are in Western Europe, two are in Asia, while the Middle East and Latin America have one each. It is interesting to note that, in some regions, a single country accounts for almost all of the regional total. Israel, for example, had 1,862 of the 1,884 students in the Middle East. Similarly, Mexico received 4.2% of all study abroad students worldwide while all of Latin America accounted for only 7.0%.

Outside of the major receiving regions, the student patterns are as follows:. In Africa, Kenya was the largest receiver with 252 students or 0.5% of the overall study abroad total. The leading country in Eastern Europe was the Soviet Union with 535 students (1.1% of all study abroad students). In North America, Canada was the only host country, with 422 students (0.9%), and finally in Oceania, Australia was the regional leader with 217 (0.5%). Because many students studied in more than one country in a region, the country percentages add up to more than 100%. Percentage calculations are further complicated by the fact that a little over 1% of the European total is reported only as Europe, with no country specified.

FIELD OF STUDY

The major fields of study of the students who went abroad were liberal arts, chosen by 18.2% of all study abroad students, followed closely by foreign languages, which accounted for 16.7%. Two other fields of study accounted for over 10% of all study abroad students, social

TABLE 12.6

Male	36.2
Female	63.8

sciences (13.7%), and business-management (10.9%). Therefore, the field of study choices of American students abroad are significantly different from those of foreign students in the U.S. Only 6.7% of Americans abroad chose engineering, physical and life sciences, and mathematics and computer sciences combined. The corresponding figure for foreign students in the United States is 39.1%.

DURATION OF STUDY

A little over a third of all study abroad students receiving academic credit spent one semester abroad (37.3%). Another quarter went abroad only for the summer (28.1%). 17.7% spent the entire academic year in the receiving country. Less than ten percent (7.9%) stayed for a single academic quarter and a scant 1% spent a full calendar year.

GENDER

The gender distribution of U.S. students abroad was almost exactly the opposite of the profile of foreign students studying in the United States. Just over a third of the study abroad students were male (36.2%), while a corresponding two thirds were female (63.8%). The gender breakdown for foreign students in the U.S. is 68.9% male and 31.1% female.

A2. COUNTRY OR OTHER PLACE OF ORIGIN OF FOREIGN STUDENTS

Appendix 2 presents the distribution of nonimmigrant foreign students in the United States by country, or other locality, continental subregion, and world region of origin. The following statistics are presented:

1. The **1985/86 Extrapolated Count**, based on data reported in *Open Doors: 1985/86.*

2. **Base Numbers**: the actual number of students for whom place-of-origin information was provided in the Annual Census (Step 2 form) in 1986/87 (see Appendix A7). Step 2 Institutional Data Reports were provided by 2,196 institutions for a total of 308,581 students.

3. **Percentage Distribution**: the number of foreign students from each country or other place of origin as a percentage of the total number of students for whom place-of-origin information was provided in 1986/87 (308,581 students). Percentages were not calculated for places with fewer than 160 students reported.

4. The **1986/87 Extrapolated Count**: an estimate of the number of students from each location based on the World Total of 349,610 foreign students, which is the rounded actual number of all nonimmigrant students reported in the survey in 1986/87. The World Total includes (a) the Base Number, 308,581 students on whom detailed country data were provided on the Step 2 form, (b) 11,369 students who were reported on the Step 2 forms, but for whom place-of-origin information was not provided, and (c) an additional 29,659 students reported on the Step 1 card by 322 institutions that did not provide Step 2 data.

For countries with a Base Number of 160 or more reported students, the Base Number was multiplied by 1.1330 and rounded to the nearest 10 to determine their extrapolated share of the total student count of 349,610. These figures are used in Part I of this book.

5. **The Percentage Change** from 1985/86 to 1986/87. Where available, Extrapolated Counts are used for the calculations; Base Numbers are used otherwise.

A3. FIELDS OF STUDY

Major Field-of-Study Categories

AGRICULTURE
01 Agribusiness and Agricultural Production
02 Agricultural Sciences
03 Renewable Natural Resources

ARCHITECTURE AND ENVIRONMENTAL DESIGN
04 Architecture and Environmental Design

AREA AND ETHNIC STUDIES
05 Area and Ethnic Studies

BUSINESS
06 Business and Management
07 Business and Office
08 Marketing and Distribution

COMMUNICATIONS
09 Communications
10 Communication Technologies

COMPUTER AND INFORMATION SCIENCES
11 Computer and Information Sciences

CONSUMER, PERSONAL, AND MISCELLANEOUS SERVICES
12 Consumer, Personal, and Miscellaneous Services

EDUCATION
13 Education

ENGINEERING
14 Engineering
15 Engineering and Engineering-Related Technologies

FOREIGN LANGUAGES
16 Foreign Languages

HEALTH
17 Allied Health
18 Health Sciences

HOME ECONOMICS
19 Home Economics
20 Vocational Home Economics

INDUSTRIAL ARTS
21 Industrial Arts

LAW
22 Law

LETTERS
23 Letters

LIBERAL/GENERAL STUDIES
24 Liberal/General Studies

LIBRARY AND ARCHIVAL SCIENCES
25 Library and Archival Sciences
LIFE SCIENCES
26 Life Sciences

MATHEMATICS
27 Mathematics

MILITARY SCIENCES
28 Military Sciences
29 Military Technologies

MULTI/INTERDISCIPLINARY STUDIES
30 Multi/Interdisciplinary Studies

PARKS AND RECREATION
31 Parks and Recreation

PERSONAL AND SOCIAL DEVELOPMENT
32 Basic Skills
33 Citizenship/Civic Activities
34 Health-Related Activities
35 Interpersonal Skills
36 Leisure and Recreational Activities
37 Personal Awareness

PHILOSOPHY, RELIGION, AND THEOLOGY
38 Philosophy and Religion
39 Theology

PHYSICAL SCIENCES
40 Physical Sciences
41 Science Technologies

PSYCHOLOGY
42 Psychology

PUBLIC AFFAIRS AND PROTECTIVE SERVICES
43 Protective Services
44 Public Affairs

SOCIAL SCIENCES
45 Social Sciences

TRADE AND INDUSTRIAL
46 Construction Trades
47 Mechanics and Repairers
48 Precision Production
49 Transportation and Material Moving

VISUAL AND PERFORMING ARTS
50 Visual and Performing Arts

INTENSIVE ENGLISH LANGUAGE
60 Intensive English Language

UNDECLARED
90 Undeclared

DETAILED FIELD-OF-STUDY CATEGORIES

A classification of instructional programs produced by the National Center for Education Statistics

CODE	FIELD OF STUDY
01.0000	**AGRIBUSINESS AND AGRICULTURAL PRODUCTION**
01.0101	Agricultural business and management, general
01.0102	Agricultural business
01.0103	Agricultural economics
01.0104	Farm and ranch management
01.0199	Agricultural business and management, other
01.0201	Agricultural mechanics, general
01.0202	Agricultural electrification, power, and controls
01.0203	Agricultural mechanics, construction, and maintenance skills
01.0204	Agricultural power machinery
01.0205	Agricultural structures, equipment, and facilities
01.0206	Soil and water mechanical practices
01.0299	Agricultural mechanics, other
01.0301	Agricultural production, general
01.0302	Animal production
01.0303	Aquaculture
01.0304	Crop production
01.0305	Game farm management
01.0399	Agricultural production, other
01.0401	Agricultural products and processing, general
01.0402	Food products
01.0403	Nonfood products
01.0499	Agricultural products and processing, other
01.0501	Agricultural services and supplies, general
01.0502	Agricultural services
01.0503	Agricultural supplies marketing
01.0504	Animal grooming
01.0505	Animal training
01.0506	Horseshoeing
01.0599	Agricultural services and supplies, other
01.0601	Horticulture, general
01.0602	Arboriculture
01.0603	Floriculture
01.0604	Greenhouse operation and management
01.0605	Landscaping
01.0606	Nursery operation and management
01.0607	Turf management
01.0699	Horticulture, other
01.0701	International agriculture
01.9999	Agribusiness and agricultural production, other
02.0000	**AGRICULTURAL SCIENCES**
02.0101	Agricultural sciences, general
02.0201	Animal sciences, general
02.0202	Animal breeding and genetics
02.0203	Animal health
02.0204	Animal nutrition
02.0205	Animal physiology
02.0206	Dairy
02.0207	Fisheries science
02.0208	Livestock
02.0209	Poultry
02.0299	Animal sciences, other
02.0301	Food sciences, general
02.0302	Dairy processing
02.0303	Food distribution
02.0304	Food engineering
02.0305	Food packaging
02.0306	Food technology
02.0399	Food sciences, other
02.0401	Plant sciences, general
02.0402	Agronomy
02.0403	Horticulture science
02.0404	Ornamental horticulture
02.0405	Plant breeding and genetics
02.0406	Plant pathology (applied)
02.0407	Plant physiology
02.0408	Plant protection (pest management)
02.0409	Range management
02.0410	Turf management science
02.0499	Plant sciences, other
02.0501	Soil sciences, general
02.0502	Soil chemistry
02.0503	Soil conservation
02.0504	Soil management and fertility
02.0505	Soil microbiology
02.0506	Soil physics
02.0599	Soil sciences, other
02.9999	Agricultural sciences, other
03.0000	**RENEWABLE NATURAL RESOURCES**
03.0101	Renewable natural resources, general
03.0201	Conservation and regulation, general
03.0202	Conservation
03.0203	Resources protection and regulation
03.0299	Conservation and regulation, other
03.0301	Fishing and fisheries, general
03.0302	Fisheries
03.0399	Fishing and fisheries, other
03.0401	Forestry production and processing, general
03.0402	Forest production
03.0403	Forest products utilization
03.0404	Forest products processing technology
03.0405	Logging
03.0406	Pulp and paper production
03.0499	Forestry production and processing, other
03.0501	Forestry and related sciences, general
03.0502	Forestry science
03.0503	Forest biology
03.0504	Forest engineering
03.0505	Forest hydrology
03.0506	Forest management
03.0507	Forest mensuration
03.0508	Urban forestry
03.0509	Wood science
03.0599	Forestry and related sciences, other
03.0601	Wildlife management
03.9999	Renewable natural resources, other
04.0000	**ARCHITECTURE AND ENVIRONMENTAL DESIGN**
04.0101	Architecture and environmental design, general
04.0201	Architecture
04.0301	City, community, and regional planning
04.0401	Environmental design
04.0501	Interior design
04.0601	Landscape architecture

A6. RESPONSE RATE

In collaboration with the Interassociational Committee on Data Collection, IIE surveyed all two- and four-year institutions with regional accreditation listed in the *HEP 1986 Higher Education Directory* to obtain data on the foreign student population in the United States.

The survey, known as the Annual Census of Foreign Students, consists of two steps. In Step 1, IIE staff ask that campus officials complete a postcard requesting the total number of foreign students enrolled at their institution. Step 2 is a form requesting aggregate institutional data on eight characteristics of foreign students. (See Appendix A7 for these survey materials.)

Table A6.0 shows the response rate of institutions surveyed for the 1986/87 academic year; **Table A6.1** indicates the types of responses received from 1982/83 to 1986/87. **Table A6.2** presents the response rate to each of the foreign student characteristics examined.

TABLE A6.0

Institutions Surveyed and Type of Response, Selected Years, 1954/55-1986/87

Year	Institutions Surveyed	Responding Institutions With Foreign Students	Responding Institutions with No Foreign Students	Total Responding Institutions	% Response
1954/55	2,855	1,629	1,013	2,642	92.5
1959/60	3,008	1,712	808	2,520	83.8
1964/65	2,556	1,859	434	2,293	89.7
1969/70	2,859	1,734	265	1,999	69.9
1974/75	3,085	1,760	148	1,908	61.8
1975/76	3,065	2,093	168	2,261	73.8
1976/77	3,016	2,294	230	2,524	83.7
1977/78	3,053	2,475	263	2,738	89.7
1978/79	3,127	2,504	248	2,752	88.0
1979/80	3,186	2,651	299	2,950	92.6

A7. SURVEY MATERIALS

ICDC
Interassociational Committee on Data Collection
AACRAO · IIE · NAFSA

October 20, 1986

Dear Colleague:

Once again IIE, on behalf of ICDC, is asking for your help in obtaining current information on foreign students, by completing the enclosed Census forms. Your response to the Annual Census of Foreign Students in the past, which has made it possible for IIE to publish very comprehensive and accurate information on foreign students in the United States, is greatly appreciated.

As you know, this information is relied upon by campus officials, as well as governmental agencies and national organizations, such as NAFSA and AACRAO, in formulating policies and setting up service programs for foreign students. In order for Open Doors data to reflect foreign study in the U.S. accurately, it is important that every school reply to the survey. Your participation is essential to the completeness and maximal usefulness of this publication. Would you, therefore, please fill in the enclosed forms and return them promptly?

PLEASE NOTE: We are sending you THREE forms this year: STEP 1 FORM, STEP 2 FORM, and a NEW SURVEY FORM (STUDY ABROAD SURVEY) (see details under (3))

(1) STEP 1: PRELIMINARY REPLY CARD: this allows us to estimate as accurately as possible the total number of foreign students in this country. Please, complete and return it AS SOON AS POSSIBLE.

(2) STEP 2: INSTITUTIONAL DATA FORM: This contains the bulk of the data which are published in Open Doors. Please return this form AS SOON AS POSSIBLE BUT NO LATER THAN NOVEMBER 14, 1986.

(3) STUDY ABROAD SURVEY: This asks information about U.S. students studying abroad. We are requesting that YOU ASSIST US in this data collection effort. Please do not simply send the survey to the study abroad office; READ THE COVER LETTER CAREFULLY BEFORE TAKING ACTION.

THE DEADLINE FOR RETURNING COMPLETED STEP 2 FORMS IS NOVEMBER 14 THIS YEAR. Please respond as quickly as possible. Your early response will help us get Open Doors to you sooner.

Completed forms and inquiries should be addressed to:

Research Division
Institute of International Education
809 United Nations Plaza
New York, NY 10017

Telephone: (212) 984-5349

Thank you very much for your assistance and your cooperation in this important endeavor.

Sincerely,

Mary Elizabeth Randall

ANNUAL CENSUS OF FOREIGN STUDENTS 1986/87

DEFINITIONS

A. **TOTAL FOREIGN STUDENTS** — a foreign student is anyone enrolled for courses in the United States who is **not** a citizen or an immigrant (permanent resident). Refugees are included. Do not include resident aliens (holding "green cards" — I-151).

B. **GENDER** — the numbers of male and female foreign students enrolled at your institution.

C. **MARITAL STATUS** — the numbers of single and married foreign students at your institution.

D. **VISA TYPE/REFUGEE** — the number of foreign students with **temporary visas** enrolled at your institution by the type of visa they hold, and the number of **refugees** enrolled at your institution.

E. **PRIMARY SOURCE OF FUNDS** — the single **greatest source** of funds for all educational expenses including associated living expenses of a foreign student enrolled in an educational institution within the United States. If a person had more than one source of funds then **use the source** which represents **the largest percentage** of all income.

   (1) Personal and Family — income derived from personal or private sources, other than current employment.
   (2) U.S. College/University — funds obtained from a U.S. college or university (grants, scholarships, waivers, research and teaching assistantships, etc.).
   (3) Home Government/University — funds obtained from the government of the student's home country or from a university in home country.
   (4) U.S. Government — funds obtained from the United States government.
   (5) Private (U.S.) Sponsorship — self-explanatory.
   (6) Private (Foreign) Sponsorship — self-explanatory.
   (7) International Organization — Examples: U.N., World Bank, etc.
   (8) Current Employment — includes only off-campus employment.
   (9) Other — primary source not among those listed. Please specify sources on page 4. Examples would be 50/50 splits, etc.

F. **ENROLLMENT STATUS** — the total numbers of foreign students who are attending classes **full time** and **part time**. Use your institution's definition of full time.

G. **ACADEMIC LEVEL** — the number of the foreign students who are currently enrolled this **fall** term by degree level or type of program. Include under Intensive English Language only students with 15 or more contact hours per week.

H. **FIELD OF STUDY** — please use categories in Section H of this form, which are derived from the NCES (National Center for Education Statistics) **Classification of Instructional Programs**. This classification system has been developed for institutional reports for federal agencies and is being implemented in federal surveys. If you are unsure of a category, use the space provided on page 4 for additional fields. A detailed listing of this classification system appears in **Open Doors from 1983/84**.

I. **COUNTRY OR OTHER PLACE OF CITIZENSHIP** — If you have students from countries not included on this form, please use the space provided on page 4.

GUIDELINES FOR THE RELEASE OF CENSUS DATA

Reports based on census data are available to individuals, agencies or corporations for clearly identified purposes of scholarly research, public information or recruitment for employment.

[illegible]

The Institute of International Education reserves the right to request that the proposed use of the data can be documented and to withhold Census data when the request is not deemed to be for appropriate scholarly research, public information or recruitment purposes.

1986/87 DATA COLLECTION STEP 2 INSTRUCTIONS

- INCLUDE ONLY NON-IMMIGRANT FOREIGN STUDENTS AT THE POSTSECONDARY LEVEL
- ALL INFORMATION SHOULD BE BASED ON THE **FALL TERM, 1986**
- DEADLINE FOR THE RETURN OF THIS FORM **NOVEMBER 14, 1986**

STEP 2 asks institutions to provide aggregate data describing the characteristics of their foreign student population for the fall term, 1986. This information is used to develop the statistics used in **Open Doors**, a complimentary copy of which is sent to the census contact at each participating institution.

The validity of the data in **Open Doors** depends on the amount of detailed data which you provide on this form to supplement the total foreign student count you provide on the STEP 1 postcard. While we encourage you to provide detail on all characteristics, if you cannot do so, **any** data, e.g. country of citizenship, field of study, academic level, etc., will add to the validity of the data on foreign students and will enhance the value of the final report in **Open Doors**.

This year's STEP 2 form includes the data in our files about your institution in two categories: (1) **Basic Institutional Data** and (2) data from the 1985/86 Census of Foreign Students which are the basis for the 1985/86 edition of **Open Doors**. The **Basic Institutional Data** (1) should be carefully reviewed and any corrections made on the form. 1985/86 Census data (2) are included **for your reference only. DO NOT ADD OR CORRECT 1985/86 DATA.** Any major differences between the two census years should, of course, be a warning that the 1986/87 figures be verified (or that the 1985/86 figures may not be correct). In cases where the data appear to have changed significantly between census years, please make sure that the definitions you are using match the definitions on this page.

Page 2 of this form is for reporting Basic Institutional Data and the Personal and Academic Characteristics of foreign students. Page 3 is for reporting foreign students' countries of citizenship. Page 4 provides space for the inclusion of fields of study and countries of citizenship which are not among those on pages 2 & 3. PLEASE NOTE. On page 4 we also ask you to indicate whether you want to continue receiving **Open Doors**.

If the data requested will be available only after the deadline date of November 14, 1986, contact IIE so that special arrangements can be made to include it in the census. Any questions should be directed to:

RESEARCH DIVISION IIE, (212) 984-5347

THIS FORM SHOULD BE RETURNED BY NOVEMBER 14, 1986 TO:

RESEARCH DIVISION
INSTITUTE OF INTERNATIONAL EDUCATION
809 United Nations Plaza
New York, N.Y. 10017

Interassociational Committee on Data Collection
AACRAO · IIE · NAFSA

October 20, 1986

TO: CENSUS CONTACTS

FROM: RESEARCH DIVISION, IIE

SUBJECT: REQUEST FOR YOUR ASSISTANCE IN COLLECTING DATA ON STUDY ABROAD

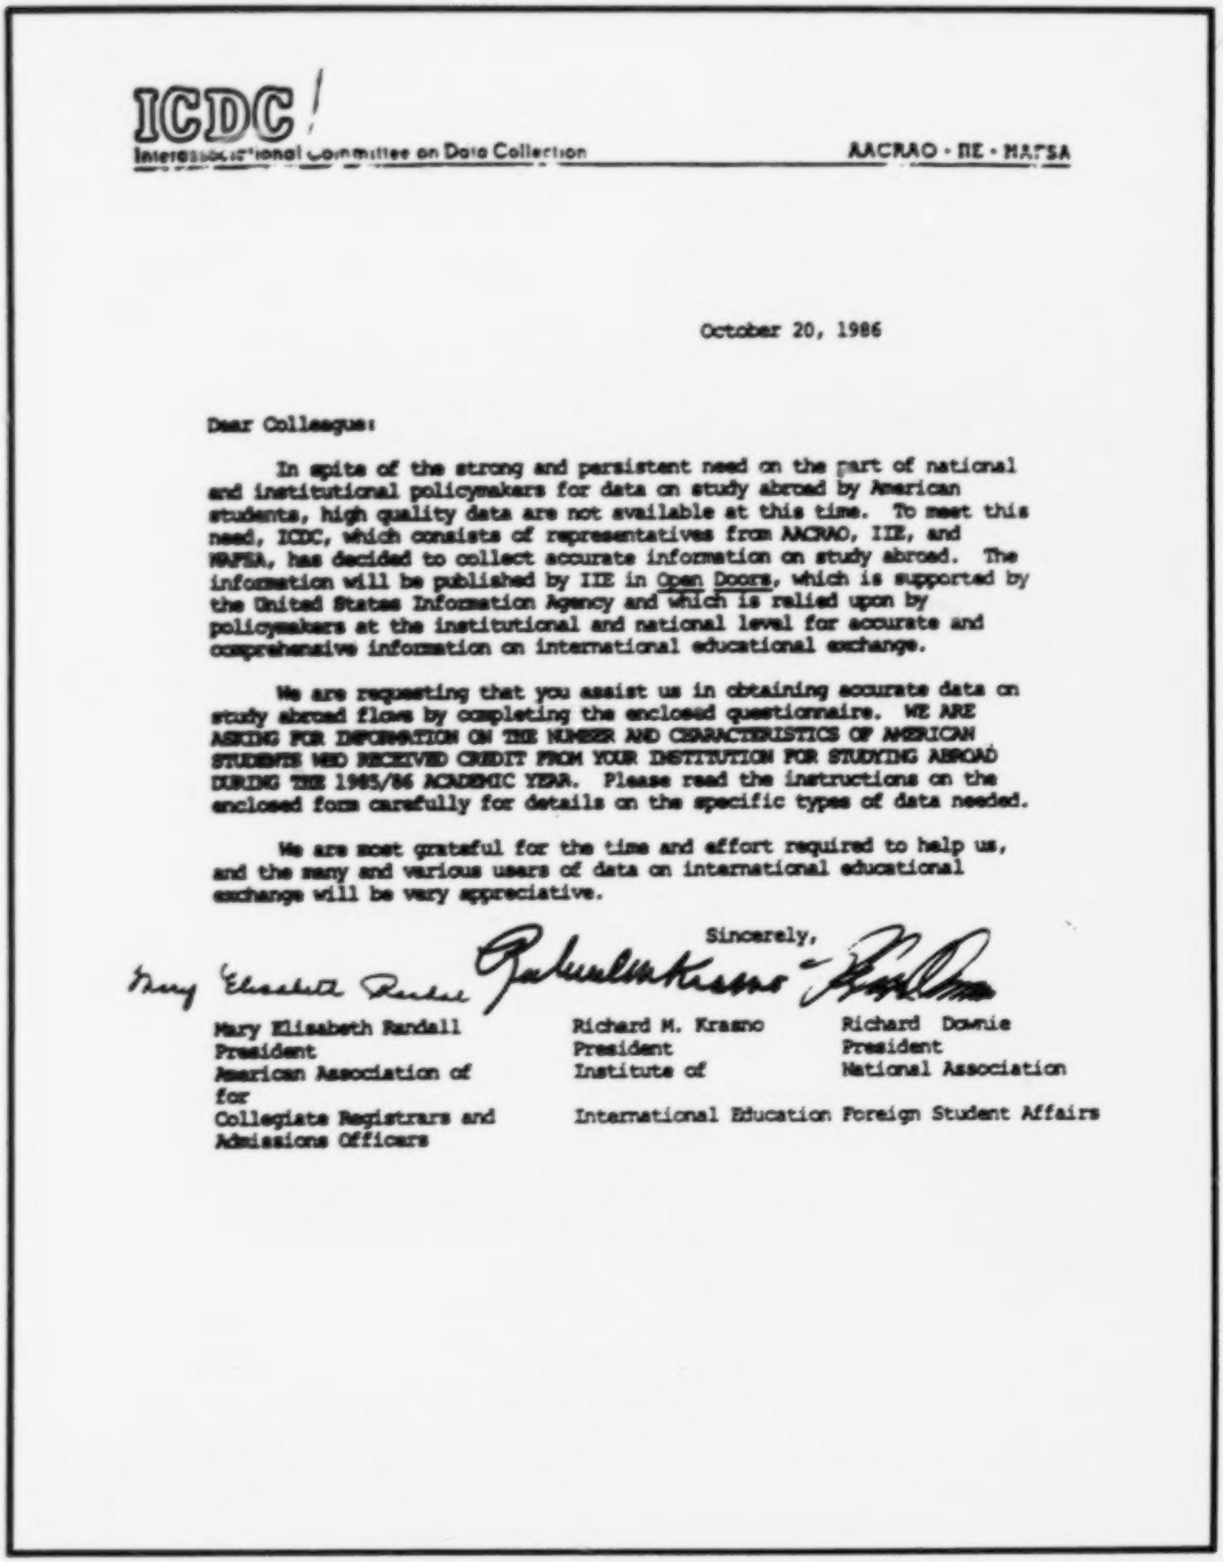
IIE is collecting much needed data on the scale and composition of study abroad by American students, and once again, we need YOUR ACTIVE COLLABORATION to make this effort successful. WE ARE ASKING YOU TO HELP US OBTAIN INFORMATION ON THE NUMBER AND CHARACTERISTICS OF AMERICAN STUDENTS WHO RECEIVED CREDIT FROM YOUR INSTITUTION FOR STUDYING ABROAD DURING THE 1985/86 ACADEMIC YEAR.

We would appreciate it greatly if you would do one of the following:

(1) If at all possible, OBTAIN THE INFORMATION FROM THE OFFICIALS WHO KEEP RECORDS ON CREDIT GIVEN FOR STUDY ABROAD AND SEND IT TO US.

(2) If you cannot obtain the information yourself, please FORWARD THE QUESTIONNAIRE WITH THE ATTACHED COVER LETTER TO THE APPROPRIATE OFFICIAL IMMEDIATELY and ask this official to complete it and return it to us. If you take this alternative, to permit IIE to follow-up on this survey, would you write the NAME, TITLE, ADDRESS AND TELEPHONE NUMBER of the person who should be contacted in the future about study abroad data on the ENCLOSED SHEET and mail it to us immediately?

We are most grateful for the time and effort required to help us, and the many and various users of data on international educational exchange will be very appreciative.



ICDC

Interassociational Committee on Data Collection — AACRAO · IIE · NAFSA

October 20, 1986

Dear Colleague:

In spite of the strong and persistent need on the part of national and institutional policymakers for data on study abroad by American students, high quality data are not available at this time. To meet this need, ICDC, which consists of representatives from AACRAO, IIE, and NAFSA, has decided to collect accurate information on study abroad. The information will be published by IIE in *Open Doors*, which is supported by the United States Information Agency and which is relied upon by policymakers at the institutional and national level for accurate and comprehensive information on international educational exchange.

We are requesting that you assist us in obtaining accurate data on study abroad flows by completing the enclosed questionnaire. WE ARE ASKING FOR INFORMATION ON THE NUMBER AND CHARACTERISTICS OF AMERICAN STUDENTS WHO RECEIVED CREDIT FROM YOUR INSTITUTION FOR STUDYING ABROAD DURING THE 1985/86 ACADEMIC YEAR. Please read the instructions on the enclosed form carefully for details on the specific types of data needed.

We are most grateful for the time and effort required to help us, and the many and various users of data on international educational exchange will be very appreciative.

Sincerely,

Mary Elisabeth Randall Richard M Krasno

STUDY ABROAD SURVEY

PLEASE READ CAREFULLY BEFORE COMPLETING FORM

INSTRUCTIONS

INCLUDE ALL STUDENTS **WHO RECEIVED ACADEMIC CREDIT FROM YOUR INSTITUTION** FOR STUDYING ABROAD DURING THE 1985 86 ACADEMIC YEAR (INCLUDING INTERSESSION AND SUMMER OF 1986)

INCLUDE ONLY STUDENTS WHO ARE UNITED STATES CITIZENS OR PERMANENT RESIDENTS

IF YOU CAN PROVIDE ONLY PARTIAL INFORMATION, PLEASE DO SO

DEADLINE FOR THE RETURN OF THIS FORM: DECEMBER 5, 1986*

In this form we are asking you to provide information on all those students who are U S citizens or permanent residents who have received academic credit from your institution for study abroad during the 1985/86 academic year, including intersession and summerof 1986.

You SHOULD INCLUDE only those students who received credit from **your institution**

A) those who participated in programs **sponsored by your institution**
B) those who were **independently enrolled** in foreign colleges and universities

DO NOT include students who participated in study abroad programs sponsored by other U S. institutions, and who received study abroad credit from those institutions.

Please provide as much information as you possibly can. But if you can provide us only with partial information, especially the total number of students who received credit for studying abroad from your institution, that will be a very valuable contribution. We would also appreciate it if you would make arrangements to have more complete information available in the future.

Direct any inquiries and return completed forms to:

Research Division
Institute of International Education
809 United Nations Plaza
New York, NY 10017
Telephone (212) 984-5347

Thank you very much for your time and effort in providing these very valuable data. Your contribution will greatly enhance our knowledge of international educational exchanges.

*Please respond to the survey as soon as possible, so that we can include study abroad data in the next edition of *Open Doors*. We would like to have the information by **DECEMBER 5, 1986**. However, since this is a new undertaking, we will accept completed forms up to **January 16, 1987**.

October 17, 1986

Dear Colleague:

We are writing to request your continued cooperation in the Survey of Intensive English Language Programs. The results of this survey are reported each year in Open Doors, a publication which is widely used by government, business, institutions of higher education, and educational exchange organizations for obtaining data on the international flow of students.

AACRAO, IIE, and NAFSA are grateful to all who responded to this survey last year. The results will be reported in the 1985/86 edition of Open Doors, now in production.

Please complete the enclosed questionnaire and return it as soon as possible, BUT NO LATER THAN NOVEMBER 17, 1986 to:

Research Division
Institute of International Education
809 United Nations Plaza
New York, NY 10017

If you have any questions regarding the survey, call the Research Division, IIE at (212) 984-5349.

Thank you for your continued cooperation.

Sincerely,

Mary Elisabeth Randall

SURVEY OF INTENSIVE ENGLISH LANGUAGE PROGRAMS: FALL TERM 1986/87

The attached label should include the Title/Office, Reporting Official and the institution's name and address. Please make any necessary changes.

(Title/Office)
(Reporting Official)
(Institution)
(City) (State) (Zip)

PLEASE REPORT ON THE NON-IMMIGRANT FOREIGN STUDENTS ENROLLED IN YOUR INTENSIVE ENGLISH LANGUAGE PROGRAM FOR AT LEAST 15 CONTACT HOURS PER WEEK IN PROGRAMS IN SESSION AS OF OCTOBER 15, 1986.

1. How many foreign students (nonimmigrants) were enrolled in your intensive English language program as of October 15, 1986? ☐☐☐☐ ☐ Check if estimated
2. The number of males/females is: ☐☐☐☐ Males ☐☐☐☐ Females
3. The number of students holding: ☐☐☐☐ F Visa ☐☐☐☐ J Visa ☐☐☐☐ M Visa ☐☐☐☐ Other Visa ☐☐☐☐ Refugee
4. If you are affiliated with a college or university, will this number be reported by that institution in the Annual Census of Foreign Students? ☐ Yes ☐ No (Check one)
5. If yes, how many will be included in the Annual Census by your affiliated college or university? ☐☐☐☐
6. Please list below the countries of citizenship of your intensive English language students:

COUNTRY	NO. OF STUDENTS	FOR IIE USE ONLY	COUNTRY	NO. OF STUDENTS	FOR IIE USE ONLY

PLEASE LIST ANY ADDITIONAL COUNTRIES ON THE REVERSE SIDE OF THIS PAGE

ANY QUESTIONS SHOULD BE DIRECTED TO: Research Division, IIE, (212) 984-5347

THIS FORM SHOULD BE RETURNED BY NOVEMBER 17, 1986 TO:

RESEARCH DIVISION
INSTITUTE OF INTERNATIONAL EDUCATION
809 United Nations Plaza
New York, NY 10017
